

Samurai Paint Changes the 2-Part Aerosol Spray Can Industry with New Patented Technology

Recently recognized as the most vibrant paint company in South East Asia that would change the aerosol spray paint industry with the new paint mixing technology

South Plainfield, New Jersey Oct 20, 2022 ([Issuewire.com](https://www.issuewire.com)) - Listed on the Stock Exchange of Singapore, Samurai Paint is a leading coating specialist that manufactures high-quality aerosol spray paints with a focus on high-performance coating solutions for the automotive refinishing and refurbishing industry.

Samurai Paint is also the world's first paint company that holds the patent to the 2-Part aerosol spray can with single-head technology. Headquartered in Malaysia, our products are distributed in Malaysia, Indonesia, Thailand and Philippines, Vietnam, Cambodia, the United Kingdom, the United States of America, and Singapore.

[2-Part Paints](#) are a type of paint that is increasingly becoming popular among painters. With the revolutionary single-head technology, the application of 2-Part aerosol spray paint has never been this easy and friendly.

We are all aware that the 2-Part Paints have been around for a while, and they have only recently become more mainstream. So, why is it so important to every single person who is in the spray paint industry? Let's look at some of its benefits compared to 1-Part paint:

UV Protection

One of the biggest benefits of 2-Part Paints is that they offer UV protection. This is especially important for painters who work outdoors. UV rays can damage paint, causing it to fade over time. But with 2-Part Paints, you don't have to worry about that because the UV protection helps keep the paint looking vibrant for longer.

Better Coverage

Another benefit of 2-Part Paints is that they provide better coverage than traditional paints. This means that you won't have to use as much paint to get the job done. Not only does this save you money in the long run, but it also saves you time because you won't have to apply as many coats of paint.

Increased Durability

Finally, 2-Part Paints are also more durable than traditional paints. This means that they can withstand wear and tear better, which is ideal if you are a professional painter who works with clients who have high expectations.

There are plenty of benefits to using 2-Part Paints. If you are a painter, then it is definitely worth considering making the switch to 2-Part Paints. Not only will you be able to save money in the long run, but you'll also be able to provide your clients with a better product.

As we know, mixing hardener and resin for 2-Part paint requires technique and the process could be time and energy-consuming when it comes to large-area spray painting. Meanwhile, Samurai 2-Part

aerosol paint simplifies the mixing process as 2 components are contained in a spray can. Samurai 2-Part aerosol spray can is a new patented design that comes with 1 valve for the hardener activator and nozzle, making it different from all 2-Part paints in the market that are designed to have double valves on the can. Instead of using an attached button on the lid, pull and twist the button to activate the hardener, Samurai 2-Part paint only requires you to activate the hardener simply by slamming it upside down.

Here are some of the unique features of Samurai's 2-Part Aerosol Spray Paint:

- Single head versus the traditional dual heads technology.
- Patented in Utility Innovation & Industrial Design in Malaysia, China, Indonesia, Philippines, Thailand, Vietnam, and Australia.
- Improved ratio of hardener to the resin of 1:2 (compared to the traditional ratio of 1:4 in the market).
- Guaranteed finishing, works just like the spray gun in a workshop.
- Sprayed items can be dried in temperatures between -7°C to 40°C.
- VOC (Volatile Organic Compounds) is compliant with international conventions.
- Easy to use, no complicated SOP, and additional equipment needed.
