

SDI Architecture announces expansion of Hyderabad office.

Hyderabad, Telangana Oct 5, 2022 ([Issuewire.com](https://www.issuewire.com)) - SDI Architecture, an international architectural and interior design firm that develops distinct, custom designs, centered upon the user's experience, today announced the expansion of its fast-growing Hyderabad office. Opened three years ago under the direction of Hyderabad native and SDI partner Prasanna Lachagari, the firm has quickly become a significant influence in architectural and interior design trends for major residential, commercial, and mixed-use projects across the region.

"The growth of our Hyderabad office is a direct result of our talented staff and the wide array of projects that SDI works on," said Ben Williams, president, and co-founder, of SDI Architecture. "From individual residences to large gated communities and residential towers, our team successfully designs projects of all sizes. Our commercial experience spans massive office complexes to hospitals and biotech facilities to industrial and manufacturing to higher education and everything in between. SDI's ability to achieve unparalleled results in such diverse industries and projects has fueled our rapid expansion and established us as a leading force in architecture and design in Hyderabad for years to come."

Beyond the economics of moving into certain emerging markets, the most dominant reason for SDI's success in Hyderabad is the access to the enormous pool of highly educated and skilled workers in a stable and safe environment. The most recent additions to the Hyderabad office's leadership, includes new firm partners, award-winning architect Chaitanya Turaga and renowned architect and interior designer S Z Ali Nawaz. Each brings a wealth of experience and industry recognition that will further propel SDI into the elite architectural echelons in India.

"By adding a top-tier talent like architects Turaga and Nawaz to our Hyderabad office, we are cementing our status as the go-to firm in the region," commented Prasanna. "Additionally, our ability to bring in staff from our Boston office to support the Hyderabad team when needed is an extremely valuable asset that distinguishes us from other local agencies. With an internationally recognized team of architects and designers at our disposal, we can tackle any project with unmatched innovation and efficiency."

SDI has also expanded its corporate social responsibility programs to include multiple Hyderabad-based initiatives. SDI is lending its expertise and relationships to raise the funds, and design and build a school for underprivileged children in Kakinada, India who currently lack access to quality education. Through this project, SDI will simultaneously create jobs for locals by providing manufacturing opportunities to those in need of income. The school will act as a platform to design accessories that local people can manufacture to be sold in the U.S.

"It is very important to us that as we grow our office in Hyderabad, we also increase the positive impact that we have on the local community," continued Prasanna. "We are invested in expanding our Hyderabad office to be the gold standard for both architectural firms and good corporate citizenship in the region."

About SDI Architecture

SDI Architecture is an international architectural and interior design firm that is disrupting the design industry through a collaborative design process that engages the client and consultants in developing distinct, custom designs, centered upon the user's experience. SDI Architecture creates distinct designs that capture the client's identity through the visual and physical experience of the built environment. We achieve this by working hand-in-hand with clients to understand their mission, culture, audiences, and

goals. We then use that knowledge to design a customized space that addresses their needs. For businesses, that includes maximizing productivity, efficiency, and employee satisfaction and health.

SDI Architecture is headquartered in Boston, Massachusetts with design offices in India and the U.S. For more information on SDI Architecture please visit <http://www.sdi.archi>.
