

Shop 50% OFF PhotoIns and Win DVD Creator Freebie at 2022 Leawo Halloween Sale

Leawo Software recently unveiled their 2022 Halloween online sale, offering 50% off PhotoIns for AI photo editing, and DVD Creator freebie for burning videos and photos to DVD.

Shenzhen, Guangdong Oct 18, 2022 ([Issuewire.com](https://www.issuewire.com)) - While people may start seeing Halloween sales hitting stores in August, the best time to snap up Halloween deals is actually in October. With the holidays approaching, people are likely to see deeper Halloween discounts, so this would be an ideal time for shopping. Leawo Software, a leading developer and supplier specializing in multimedia solution and data management software, recently launched their [2022 Halloween Free Giveaway & 70% OFF Specials](#), from where people can shop up to 70% off handpicked bundles and singles, redeem 30% off site-wide coupon, as well as win \$29.95 worth of [DVD Creator](#) as a freebie.

Whether people celebrate Halloween by wearing the spookiest costume or by giving out the most candy, taking photos to commemorate unique Halloween costumes is just as important as this ghoulish day. However, the quality of photos at night is always not ideal. Therefore, Leawo Software has launched [50% off PhotoIns](#), especially for this situation. Driven by AI technology and a smart algorithm, people can easily enhance photo quality, remove and change photo backgrounds, and even enlarge photos by up to 40x. Now, for a limited time, a lifetime license of the entire package is just \$54.97, which means a single module only costs less than \$18.35, a total savings of \$54.98. For more details, the following are introductions to each module.

- [Photo Enhancer](#) – Powered by advanced AI technology, this software can help people easily enhance photo quality by fixing exposure, adjusting white balance, improving colors, boosting contrast, removing haziness, retouching skin, repairing lens-related issues, removing freckles, enlarging eyes, and more. With the support of batch processing, photos can be enhanced and output immediately, without manual intervention.
- [Photo BG Remover](#) – Thanks to the smart algorithm, this software provides a one-stop solution

for batch background removal, even the background around hair and the background behind the transparent object can be removed precisely. It analyzes the clipping edges and removes the photo background automatically. Also, with the manual adjustment toolbar, users can edit and change backgrounds manually, as well as add various effects to photos.

- [Photo Enlarger](#) - Equipped with the same AI technology as Photo Enhancer, this software can enlarge photos by increasing image resolution rather than just upscaling pixels. At the same time, it improves color rendering, reduces artifacts, and enhances detailed texture to keep enlarged photos as clear and sharp as the original. With a versatile toolbar, it can remove noise to fix blurry images, as well as optimize contrast, sharpness, and brightness.

Even though this is the digital age, there are still people who prefer to collect physical copies. Leawo Software has specially prepared DVD Creator for these people. With the support of 180+ formats, this software can easily burn videos in formats like AVI, MKV, MP4, WMV, etc. to DVD-9 and DVD-5. Also, users can make photo slideshow with various templates and then burn them into the blank disc via this software. In addition, it has a video editor that can trim video, add watermarks, add 3D effects, remove noise, and more. Now, people can head to Leawo's Halloween promo page and enter their email to win this powerful DVD burner as a freebie.
