

TestCrew Finalist in the North American Software Testing Awards

This announcement reinforces our commitment to providing our clients with the best possible software testing and quality assurance services. We look forward to continuing to set the standard for excellence in our industry.

Ar-Riyad, Saudi Arabia Oct 19, 2022 ([Issuewire.com](https://www.issuewire.com)) - [TestCrew](#) is thrilled to announce that they have been named as a finalist in the North American Software Testing Awards. Naming TestCrew as a finalist in these awards is significant this time as they are chosen in four categories which are: Best use of Artificial Intelligence (AI) in Testing, Best Test Automation Project – Non-Functional, Testing Team of the Year, and Graduate Tester of the Year.

This announcement reinforces our commitment to providing our clients with the best possible software testing and quality assurance services. We look forward to continuing to set the standard for excellence in our industry.

The North American Software Testing Awards celebrate companies and individuals who have accomplished significant achievements in the software testing and quality assurance market. TestCrew is honored to be recognized among its peers for its dedication to quality assurance and excellence in testing.

TestCrew would like to congratulate the other finalists and thank the board of North American Software Testing Awards for this recognition. The ceremony will take place on the 9th of November in, Atlanta, GA.

TestCrew is a global leader in software testing and quality assurance. With over 15 years of experience,

TestCrew has helped hundreds of companies achieve their testing and delivery goals. From start-ups to enterprise organizations, our team has a proven track record of success.

[TestCrew](#) offers a full suite of services, including functional testing, performance testing, security testing, test automation, and more. We also offer to consult services to help companies optimize their delivery processes and improve their quality management practices. Our team consists of expert testers who are passionate about quality assurance and delivering world-class software products.

TestCrew's software quality solutions and testing platforms are based on years of experience and successful implementations in many projects. The CrewLoad, CrewCentric, and CrewMon platforms are robust quality platforms that quality engineers in TestCrew use. These platforms provide the necessary foundation for software quality assurance and testing. They are also flexible and extensible, so they can be adapted to the specific needs of each project. The TestCrew team is an expert in using these platforms and has a proven track record of delivering high-quality software products.
