

VUGERA releases new QX8 at SEMA 2022

The VUGERA QX8 2.5K Quad-HD Dashcam with 60 FPS Performance

Irvine, California Oct 19, 2022 ([IssueWire.com](https://www.IssueWire.com)) - Adorned in a premium black matt finish, the all-new VUGERA QX8 will be showcased at the 2022 SEMA Show.

Inspired by luxury automotive designs, the QX8 has a black matt paint finish on the front grille giving it a very progressive and premium look. Not only is the QX8 compact, but it offers a super low-profile stance once mounted onto the front windshield. The QX8 is also available with a genuine design cover giving buyers the option to make their dashcam installation cleaner with a hidden wire finish. The recommended retail price of the QX8 base model starts at \$199.

The QX8 shares its KYS (Kombi-Ypsilon-Struktur) platform with the UX9 4K but is built with a 2.5K Quad-HD CMOS sensor at the front enabling a smooth recording frame rate of 60 FPS in one channel mode. The Quad-HD image sensor is a 2.5K back-illuminated (BSI) sensor enabling optimal image quality in visible light and near-infrared (IR) light regions.

All VUGERA dashcams are supplied with Samsung Electronics' micro-SD card featuring the latest V6-NAND technology ensuring high endurance in high-temperature operations and long-term reliability.

In the digital era of the display, the QX8 features a 2.7-inch IPS-LCD with a premium window touch screen for quick access to the footage as well as Wi-Fi connectivity for Android and iOS device users. Hyper-lapse recording mode can be used while driving and during parking mode for longer recording times. The QX8 also features an Ultra-Low Power Mode (ULPM) for maximum energy savings when leaving the dashcam on stand-by during long Parking Mode requirements.

VUGERA is showcasing the QX8 as well as the Lexus' world 1st 4-year warranty (OEM) dashcam developed by VUGERA at the 2022 SEMA show. Deliveries of the QX8 will begin in early 2023.

About VUGERA

Founded in 2011 by KANAUI Mobility, VUGERA is a South Korean dashcam brand certified for IATF (International Automotive Task Force) 16949:2016 quality management standards, supplying, and developing OE before-market solutions for world-leading luxury car makers such as Mercedes-Benz and Lexus. KANAUI Mobility is also one of the largest after-market dashcam manufacturers with a smart production facility accredited by the South Korean government.
