

Big Brother has evolved in this gripping dystopian science fiction novel by Dorian keys

How much of your life are you willing to surrender to live in a perfect world? Your family? Your friends? Your entire identity?

New York City, New York Nov 21, 2022 ([IssueWire.com](https://www.issuewire.com)) - The book [Yesterday's Tomorrow](#) takes place in the not-so-distant future, following Earth's government takeover, and near collapse. It's told from the point of view of Elton Nett, a native of Earth. Elton was born to a working-class family where he lived in relative poverty till his teens. When political changes initiated almost complete automation, the human population suddenly became jobless, and society quickly destabilized.

Earth's governments then implemented 'the System' to enforce its laws. Some nations, and sections, accepted it. Others resisted, adopting the slogan "**DOWN WITH THE ROBOTS.**" The human resistance staged riots, destroying entire segments of what Elton had called home.

The System controlled every aspect of life and humanity. Using androids, it terraformed and colonized Mars, then later a planet orbiting Sol in the asteroid belt's outskirts—Ceres2.

With the hope of a better life, Elton and his parents immigrated to fully habitable Mars. But, unfortunately, the same became of Mars only a decade after they had settled. Thus, coupled with a series of devastating events, Elton then finds himself forced to immigrate on his own to Ceres2.

Isolated on this new planet, Elton is faced with several dilemmas that will undoubtedly change what would have been **YESTERDAY'S TOMORROW**.

The Author

Dorian Keys, born in Tirana, AL, displayed an aptitude for writing from an early age. Though due to the local geopolitical situation at the time, this potential was not overly encouraged. At the age of seven, he wrote two short stories, one of which currently hangs above his father's work desk.

Eventually, after receiving his formal education in Biology from Queens College, NY, Keys found his long-lost calling. Writing.

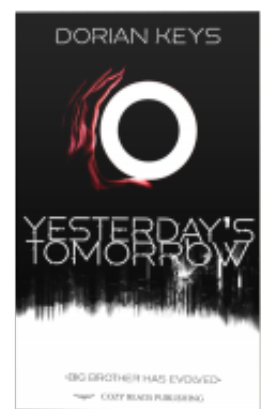

His debut novella, a hybrid publication, **IMPRINT LEGACY** (2019), was very well received in the US and abroad. While his second book, **MORNING STAR**, received a five-star review from **Literary Titan**, and **Booklife** remarked:

"...the author has a knack for action-packed adventures that employ heroic achievers." BookLife (Publishers Weekly) (2020)

Keys currently lives with his family in New York and writes every chance he gets.
