

Lodgipay Partners with Direct Processing Network to Offer Fully Integrated POS & Payments for Hospitality Operations

Miami, Florida Nov 24, 2022 ([Issuewire.com](https://www.issuewire.com)) - Softlogix, creators of the Lodgipay software, announced a strategic partnership with Direct Processing Network at this year's HITEC conference, an event celebrating more than 50 years as the world's largest and oldest hospitality technology conference.

Direct Processing Network provides innovative solutions that allow businesses and organizations all over the country to enhance their day-to-day and overall operations. They specialize in Point of Sale systems and payment software. Their primary goal is to improve the guest experience for hotels and streamline operations.

The partnership between Softlogix and Direct Processing Network will enable hotels, resorts, casinos, spas, and other sales outlets to offer fully integrated payments from their Clover POS systems into a large range of Property Management Systems (PMS) such as Opera PMS.

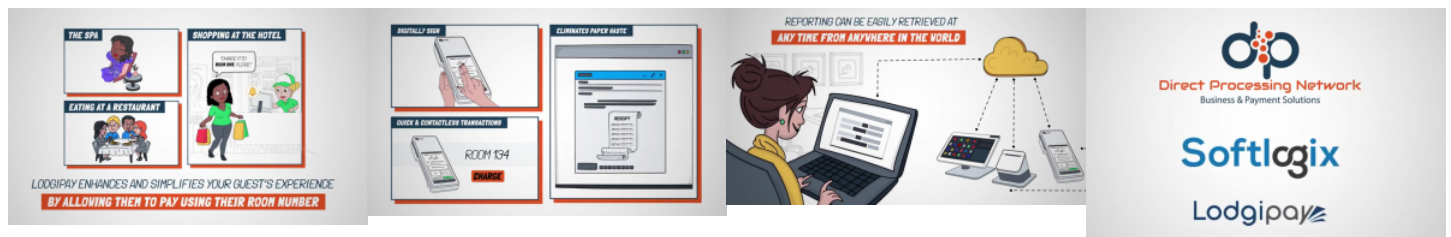

"We're excited to partner with Direct Processing Network," said Softlogix CEO Eddie Lee. "Jose Molina and the Direct Processing Network team are experts in the Clover POS platform, and they have a proven track record in the hotel and restaurant space. Our partnership will add great value to both F&B and hotel operations nationwide."

Lodgipay allows hotels to use Clover's innovative and simple Point of Sale systems in any of their outlets

including restaurants, coffee bars, retail shops, salons, and event outlets. With this integration, Lodgipay will allow guests to pay for their purchases by simply providing their room number or room key. Guests can also digitally sign for their purchases using the Clover Flex (Clover's mobile POS) making interactions paperless, while also minimizing contact.

Clover POS is a cloud-based Point of Sale system that helps businesses manage their inventory, customers, and sales. It includes features such as native online ordering, customer loyalty and rewards, and self-ordering kiosks. The Clover POS system also offers integrations with popular accounting and CRM software which allows businesses to track their sales and customers from anywhere. Hospitality business owners can also enjoy the benefits of viewing reports from anywhere with an internet connection.

The Clover POS system is simple to set up and use, making it an ideal solution for businesses in the hospitality industry. With several hardware sizes such as the largest of the Clover POS Systems, the Clover Station Duo, to the smaller yet most popular Clover Mini, you will have the ability to customize the Clover POS system that will best fit your business' space and needs. Regardless of size, each Clover POS system model comes with all the powerful software tools to help you run your hospitality business more efficiently.
