Patna, Bihar Nov 22, 2022 ([Issuewire.com](https://www.issuewire.com)) -

Medassist Hospital Management Software is pleased to announce the release of its latest software update. This update includes a number of new features and improvements, including - Improved patient management tools, making it easier to keep track of patients and their medical histories. A new

medication management system makes it easier to track and manage the medications of patients.

- Improved financial management tools, making it easier to keep track of hospital finances
- A new reporting system, making it easier to generate reports on hospital activity

This latest update builds on the already strong foundation of Medassist [Hospital Management Software](#), and we are confident that it will help our customers to better manage their hospitals and provide better care for their patients.

About Medassist

Medassist is a leading provider of healthcare software solutions that help hospitals and clinics to streamline their operations, improve patient care and reduce costs. The company's comprehensive suite of [software solutions](#) includes patient management software, clinical information system (CIS) software, medical billing software, patient portal software, medical imaging software, and other hospital management software. Medassist's products are used by many hospitals and clinics across India.

Medical records are the source of data that is used to maintain the patient's health care history. In addition to the medical records, a computerized [Hospital Information System](#) is also used to maintain and update the patient's health care information. This is an information system that integrates the functions of a hospital's patient records, financial records, and clinical records. The system includes a software application that can be used to manage the patient's health care information. The system also includes a database that stores the patient's health care information.

Features:-

1. Medassist Hospital Information System is a comprehensive, integrated information system that provides a complete view of a hospital's operations.
2. It includes modules for clinical care, financial management, human resources, and other hospital functions.

3. It provides real-time information to hospital staff and administrators.
4. It offers a customizable interface that allows hospitals to tailor the system to their specific needs.
5. Medassist [HMS Hospital Software](#) is scalable, so it can be easily expanded to meet the needs of larger hospitals.
6. It can be customized to the specific needs of individual hospitals.
7. It is easy to use and navigate.
