

Most underrated artist in the Indian indie music scene!

Started writing songs at a young age, deadpoetmusic has developed through many phases that all independent artists go through. He is undoubtedly one of the most underrated and versatile artist based in India.

Chennai, Tamil Nadu Nov 29, 2022 (Issuewire.com) - Chennai-based artist *deadpoetmusic* set to release his first EP this December. Been writing songs since 2010 *deadpoetmusic* is a prolific lyricist and his pen skills can be adored on his recent releases and the same is expected on his debut EP '*The Survival Guide*'. The artist has been repping the underground music scene for over a decade with little

to no active following due to his personal struggles with life-changing traumas and substance abuse issues. The setback that has kept the artist in dark for so long was the click he needed as he crafted all his pain into poetry with impressive flow and composition.

The artist is not limited by the boundaries of a genre and tends to find himself writing poems and songs that cross the limitations of the hip-hop genre that the industry usually expects from an emerging artist.

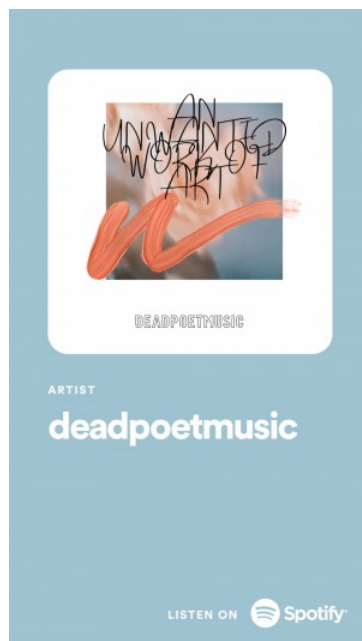

However, their versatility with the pen and his flow has helped him compose songs that reach out to a mass number of listeners from all walks of life and have an impact on every listener in a different way. Make sure you pre-save the debut EP from his site or social handles as this kind of music deserves all the appreciation and support from the music community as it would support this versatile and motivated artist to turn more of his pain into poetry and in return healing the pain of the masses through music. His music speaks volumes to people from different walks of life.
