

NASA Astronaut Ron Garan on Peace and Unity, inspiring children

Colonel Ron Garan visited the Principality upon the initiation of Monaco resident Zsolt Szemerszky, to meet and greet the future generation and offer them the chance to ask the former-NASA Astronaut their most intriguing questions.

Monte Carlo, Monaco Nov 11, 2022 ([Issuewire.com](https://www.issuewire.com)) - The [ELEVATE Monte-Carlo Space Conference](#), driven by awe and wonder with actionable takeaways, was followed by a spectacular two-Michelin star VIP dinner prepared by renowned SBM chef, Marcel Ravin.

The gala dinner was attended by Monaco dignitaries, socialites, and UHNW individuals, with a combined net worth of 27 billion euros. Among the distinguished guests, one could find Cécile and Antoine de Massy, Bernard d'Alessandri, Alexey Antropov, Safia El Malqui, David Yakobashvili, Marina Melia, Vitaly Malkin, Victoria Silvestedt, Victoria Bonya, Régis Bergonzi amongst other influential guests.

During the daytime, Ron Garan held a public conference inspiring the guests with amazing stories of spaceflights and spacewalks from his journey beyond the edge of space, as well as the evolution of his perspective on humanity.

The conference's main message was that we can achieve more together in peace and unity. Ron Garan's philosophy is to zoom out to a greater perspective where we can see one planet as one

borderless spaceship, called planet Earth. This can foster collaborative environments where teammates can achieve their true potential.

The Astronaut's message was in harmony with the thoughts of the Chilean philosopher, Dario Salas Sommer, known especially for his exploration of moral aspects of human life and personal development.

A private letter from the Chilean philosopher, founder of the Latin American Foundation Simon Bolivar was at the disposal of the organisers thanks to a Monaco resident student of the late philosopher.

[In this letter](#), written a year before his death, Dario Salas Sommer said: "Human beings and nations urgently need to reach an understanding by communicating with each other in a genuine and harmonious manner. If not, their actions turn against them and as a species and as humanity we are inexorably bound to disappear."

This event was proudly supported by [Antropov Foundation](#), [Omère Longevity Institute](#), and [Lanteri Partners Group](#); and organised by [Zsolt Szemerszky](#) and [Olga Barrale](#).
