

Netvue Birdfy Launch Various Feeder Accessories to Attract Diversified Birds

Los Angeles, California Nov 22, 2022 ([Issuewire.com](https://www.issuewire.com)) - Netvue Birdfy has always provided bird lovers with excellent birding experiences. In order to further meet the diversified needs of bird lovers, Netvue has launched a series of bird feeder accessories. By adding these extensions to Birdfy, users will significantly upgrade their bird-watching and feeding experience.

For the pre-purchase period, these extension design has won great applause from customers. Many clients indicated that these accessories enable them to attract more genres of birds to their yards, thus collecting more interesting photos for their galleries. Now, Netvue birdfy extension accessories are officially opened for purchase. Many Birdfy users have already included them in their must-buy list.

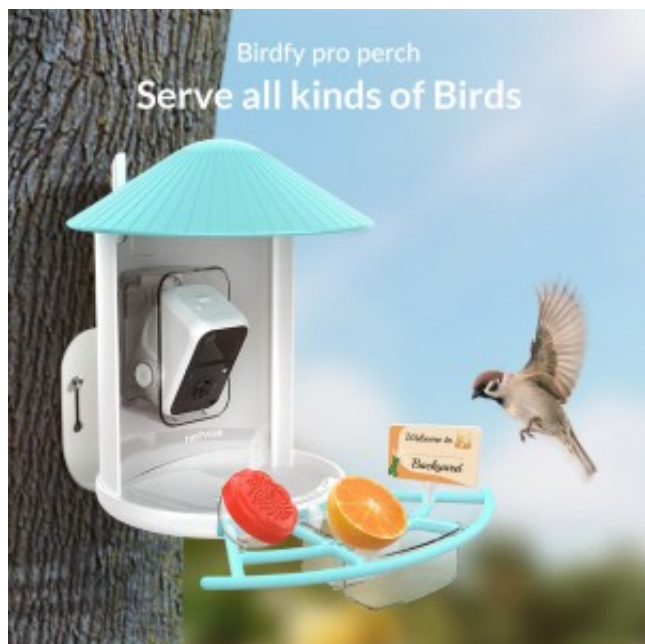

Birdfy Hummee | Exclusive Extension for Hummingbird

Hummingbird is one of the most popular wild birds among many bird lovers. Novice and professional bird watchers find them attractive because of their speed and dexterity. Due to the particularity of its feeding habits, Netvue has specially designed an expansion accessory to upgrade Birdfy to a hummingbird feeder. When you first see this [Birdfy Hummee](#) accessory, your eyes might first be attracted by the red lid with a red flower design, like the hummingbirds! They love flowers with eye-catching colors too. Birdfy Hummee adopts a good-looking design with a polycarbonate structure, it can not only prevent the ants and bees from polluting the reservoir, but also serves as the best un-leaking container to hold up to 18.3 oz nectar. The perch design also helps hummingbirds to take a quick rest while they are eating. The linear design of flowers staggers the birds and allows them to nectar food easily no matter how many visitors there are.

Birdfy Pro Perch | The Pro Extension Set to Take Care of All Birds

Not just fans of hummingbirds? Don't worry, Netvue also provides [a Birdfy Pro Perch extension set](#) for users to serve all kinds of birds. Netvue Birdfy Pro Perch allows users to DIY different add-ons to attract their favorite birds to yards. The pro extension includes (1) Fruit holder: A container specially designed for Orioles, Cardinals&finches to hold fruits, such as oranges. (2) Jelly feeder: A container specially designed for Orioles to hold jelly, usually combined with a Fruit holder(3) Mini hummingbird feeder: A mini container that allows users to match ordinary bird food and nectar at will to attract hummingbirds(4) Suet feeder: A feeder that is specially designed to feed Woodpeckers, Chickadees, Jays and other birds in winter to help them stay healthy and survive in the winter(5) Welcome card: A great tool for you to welcome lovely birds by writing down a welcome message and the daily recipe.

All of the above Birdfy's accessories are very convenient to install and clean up, allowing users to explore Birdfy's potential and upgrade their birding experience at a preferential price. Consider purchasing these accessory sets to get "A perfect-for-all-birds feeder", owning one Birdfy means having multiple bird feeders to meet the needs of various birds!
