

NTGD: Manufacturers and suppliers of all types of pumps

Northern Cape, South Africa Nov 12, 2022 ([Issuewire.com](https://www.issuewire.com)) - NTGD pump Co., Ltd. is a certified pump manufacturer. NTGD performs both research and development, sales, and services to ensure reliable products as well as customer satisfaction. The reason for highly reliable pumps from NTGD is due to advanced production technology, complete test equipment, reliable quality, and scientific management. In addition, NTGD has partnered closely with various domestic research institutions to make their products sell well all over the world. NTGD [pump manufacturer](#) always adheres to the path of “quality for survival and quality for development” by employing advanced design and manufacturing technology which has made it reach high reliability and standards over the decades. NTGD engineers adopt advanced design including CAD software and CFD dynamics software to ensure the products meet all aspects of reliability and long service life.

The products from NTGD pump manufacturer not only go through rigorous design processes but also passes through other processes such as precision casting, hot forging, heat treatment, welding, finishing, and assembly. Other advanced equipments used in manufacturing are chemical, physical, and flaw detection equipment which fully realizes the digital engineering of CAD/CAM/CAPP/CAE/PDM.

Research and Development

The research and development team performs both basic and advanced research to ensure product development and enhancement. Such research helps to get better ideas on pumps and how they work. This team ascertains that the product is best for customer use even before it is manufactured.

Quality assurance

The quality assurance team is responsible for ensuring consistent, and high-quality levels of products from NTGD pump manufacturers. This team also ensures that any product that does not meet the product standards is rejected. The QA team consists of professionals who work closely with the manufacturing and product testing team. As such, this team gives a comprehensive quality check to ensure product quality is not compromised at all.

Production

The production team is tasked to convert raw materials and other inputs into finished products. During the production processes, the team works to ensure efficient production aimed at ensuring products meet the required standards. This team consists of various professionals who have been trained and equipped with quality materials to ensure the production of superior products. The production team ensures that all the manufactured products are ready for shipment. It also works closely with QA and product testing team to comprehensively check and maintain machine status. NTGD is a leading [chemical pump manufacturer](#) and [centrifugal pump manufacturer](#).

Sales and Consultation

This is a team of professionals who perform analysis and recommendations to clients on how to improve their sales. As such, the NTGD pump manufacturer team in the sales and consultation ensures clients are well informed about the products they need. Such information entails which pump is best for specific applications and the advantages of such a product.

About NTGD

NTGD is a proven pump manufacturer and supplier in the international market. It has been in operation since 1991. During these three decades of operation, NTGD has worked with different professionals which are design engineers, process engineers, production specialists, and logistics experts who have ensured quality pumps, timely delivery, and factory optimization.
