

Oh, Baby! Tutti Bambini Enters the US Market

Tutti Bambini nursery furniture has become a fixture in nurseries across the United Kingdom and is now poised to enter the American market.

Hollywood, Florida Nov 11, 2022 ([Issuewire.com](https://www.issuewire.com)) - AGI Supreme is pleased to announce that [Tutti Bambini](https://www.tuttibambini.com) is expanding to the United States. The family-owned nursery furniture company, which was founded in the United Kingdom and is known for assisting new mothers and fathers during their first steps into parenthood, will offer a consolidated online catalogue exclusively for shoppers in the United States.

"We are honored to offer a consolidated catalog in the United States, essentially selling the most popular Tutti Bambini product, CoZee, and variations of CoZee (original, Air, and Luxe), as well as accessories to complement the CoZee. This is a fantastically innovative brand that we are excited to share with the US market" AGI Supreme's Dan Pennacchio asserted.

Tutti Bambini grew from humble beginnings in a small London shop to become a standard in nurseries across the United Kingdom, and that same high quality is now available in the United States. The flagship product, the CoZee Bedside Bassinet, will be available exclusively in the United States.

CoZee® Bedside Bassinet

The CoZee is ideal during the first few weeks and months of a baby's life when the strongest bond between parent and child is formed. The CoZee Bedside Bassinet enables safe co-sleeping while keeping the baby close for added security.

Furthermore, the adaptable piece of furniture is designed to assist parents in developing that special bond with their child and can also be used as a standalone crib. The innovative 30-second open-and-fold mechanism of the CoZee Bedside Bassinet also allows parents to use the sleeper on the go, making it a home away from home for their baby.

CoZee is more than just a comfortable bed; it also has six different height positions, and a handy self-storage shelf, and when not in bedside mode, users can easily lock the drop-side into place and fasten the zips to create a standalone sleeper.

Shoppers will be able to discover this popular company that has been a stalwart in the UK for more than 30 years as the brand is introduced to parents in the United States. CoZee is intended to provide a variety of side sleeping benefits from birth to six months, including

- Helps to create and strengthen that special bond between parent and baby
- Allows easier breastfeeding
- It provides reassurance that the baby is nearby
- For the first six months, the baby can be safe in his or her parent's bedroom.

The AGI Supreme team is thrilled to be bringing Tutti Bambini to the US market and invites everyone to visit their website to learn more about this prestigious nursery furniture company and its products.
