Danbury, Connecticut Nov 25, 2022 ([IssueWire.com](https://www.issuewire.com)) - Mikael Carlson, the award-winning author of highly-rated political fiction novels including “The iCandidate,” “The Black Swan Event,” and “The Eyes of Others,” has released his thirteenth novel, “Revealed Secrets.”

Following the events in “Justifiable Deceit,” journalist Tierra Campos and FBI Special Agent Victoria Larsen stumble upon a plot to influence the New Hampshire Democratic Primary and manipulate the upcoming presidential election. The stakes cannot be higher – the fate of the Republic and the democratic election of American leaders hang in the balance.

“Conversations about voter fraud have dominated the media for the past several election cycles,” Carlson explains. “This story arc about a cabal of powerful interests trying to rig a national election to control the presidency is scarily realistic, considering those conversations. The goal isn’t to demonize a political party or ideology. I want readers to thoughtfully reflect on the role of media, law enforcement, and our obligations as citizens in modern society.”

In “Revealed Secrets,” America has turned its attention to the November presidential election. Candidates crisscross the country, pressing hands and pleading for votes while the media covers their every move. Under the shadow of the attempt to hijack a primary election in New Hampshire, the nation is on guard for more turbulence at the polls – and with good reason. While Victoria tracks down a dangerous fugitive, Tierra no longer has any leads to follow until a cryptic new puzzle arrives for her from beyond the grave. As Tierra races to crack a code that she hopes will lead her to the roots of a conspiracy, she must throw a desperation hail mary to stop them from succeeding. The novel is available on [Amazon](https://www.amazon.com) in paperback, hardback, and ebook exclusively for Kindle. An audiobook version will be released in 2023.
