

Quality Dental Plan - Lakewinds Dental Centre

Ludington, Michigan Nov 29, 2022 ([Issuewire.com](https://www.issuewire.com)) - Periodontal disease, often known as gum disease, is a leading cause of tooth loss and can lead to infections and other issues. Research has found a link between periodontal disease and various other health conditions, including troubles with the heart and strokes, complications with diabetes, respiratory problems, and teeth and gums. Although dental treatments have become costly, you don't need to worry about the expense. At Lakewinds Dental Centre, the expert dentist has developed [quality dental plans](#) (QDP) to provide dental treatments at a lower price.

The dentist in Ludington further explains that in contrast to conventional insurance plans, the QDP program does not impose any deductibles, annual maximums, or waiting periods before the beginning of treatment. When you sign up for QDP, you will immediately receive benefits and savings.

The dentist has divided their benefits into two different categories. First, there's the Standard QDP Savings Plan, and then there's the Periodontal QDP Savings Plan. For patients' convenience, the dental office in Ludington has listed the recommended dental savings under headings clearly. See the Lakewinds Dental Centre website for more information on the benefits they are providing.
