

Teknikforce Launches ShopFunnels To Help Small ECommerce Businesses Become Successful Again

ShopFunnels, the newly launched SaaS by Teknikforce, is helping ordinary people build their own eCom store now at a very small budget.

Sharjah, United Arab Emirates Nov 2, 2022 ([IssueWire.com](https://www.issuewire.com)) - Teknikforce Ventures LLC announced the launch of their brand new SaaS- ShopFunnels, an amazing eCommerce platform that enables even ordinary people to build a profitable online store in minutes and sell anything they want.

People nowadays prefer buying things online rather than visiting physical stores. This is why most offline businesses are now creating their own online stores and selling things online to target a larger audience. That's where small eCom businesses face issues as they have a lower budget and creating an online store is not a cup of tea.

It takes a lot of time, effort, and money to take an eCom business off the ground. Even if you do manage to get it off the ground, it's unlikely that you'll be able to generate enough traffic and convert that into sales easily.

Keeping all these in mind, Teknikforce has built ShopFunnels.

ShopFunnels has everything one needs to build a successful eCommerce business. It allows the creation of attractive storefronts, and product pages, and offers smooth check-out processes to enhance customer experience.

It has a huge collection of ready-made templates and offers dozens of in-built plugins ready for use. A user-friendly interface, affordable pricing, and 10+ payment integrations are some features that make ShopFunnels stand out in this cut-throat competition.

Talking about how ShopFunnels helps small eCom businesses, Cyril M Gupta, CEO, of Teknikforce Ventures LLC said "Why should a small business have to invest thousands of dollars just to get started and then lock themselves in, on a platform that charges a hefty commission per sale? With ShopFunnels we bring control and power to businesses and let them keep all their revenue. The first powerful ecom platform that does so."

Online sales are propelling expansion in every possible area. Hence, this is the ideal time to start business expansion and ShopFunnels will make this expansion much smoother and more profitable.

Teknikforce is all set to make small eCommerce businesses profitable again with its innovative invention of ShopFunnels. You can learn more about ShopFunnels here- <https://getshopfunnels.in/sales>
