

# BitRecover Office 365 Backup Software Major Update Released with Enterprise Features

BitRecover Office 365 Backup Software major update recently releases. Now the tool became more effective and faster. Even several advance features are also embedded with this O365 Backup Tool.

**Sanford, Florida Dec 3, 2022** ([Issuewire.com](https://www.issuewire.com)) - BitRecover Software Company recently released a major update for [Office 365 Backup Software](#). Now, this software became enterprise ready for successfully handling all crucial queries as mentioned below.

- How to do office 365 tenant-to-tenant migration?
- How to migrate emails from Office 365 to Office 365?

## BitRecover Office 365 Backup Software Highlight Features

**Complete Office 365 Backup:** Office 365 Backup Software is a fully authenticated tool for complete Office 365 backup together with emails, contacts, calendars, tasks, notes, and journals. Thus, users can download all Office 365 data from the cloud to their local pc.

**Backup All Types of Mailboxes:** This Microsoft 365 Backup Wizard gives permission to backup

Office 365 primary mailboxes, in-place archive mailboxes, and shared mailboxes. Thus, this utility is well suitable to take backups of all types of Office 365 mailboxes.

**O365 Backup from Multiple Accounts:** Updated BitRecover Office 365 Backup Wizard works smoothly when taking the Office 365 backup from multiple user accounts at once. To benefit from this facility, you need to log in with Office 365 admin credentials. Don't forget to check the "I am Admin" option from the welcome screen.

**Advance Filters for M365 Backup:** Office 365 Backup Software comes with various advanced filter options, as mentioned below:

- **Date Range:** Set a specific date range while taking the backup of the Office 365 email account.
- **From:** Enter From (sender) email address to backup Office 365 emails sent from a specific email id.
- **To:** Fill To (receiver) email address if you want to backup Office 365 mailboxes received from a specific email address.
- **Subject:** Enter email subject for downloading same subject email messages from Office 365 account.
- **Exclude Folders:** Enter the name of folders to exclude them while taking Office 365 backup locally.
- **Has the words:** Users can enter some words for downloading Office 365 emails having the suggested words.

**Extract Email Addresses and Attachments:** As per the demand of enterprise-level customers, we have added a separate option to export Office 365 email addresses from all email fields i.e. To, Cc, Bcc, From, Email Body, etc. This option is helpful for creating an email address database for email marketing needs. Even it is an isolated option to extract Office 365 attachments available in emails.

**Export O365 Emails to PST:** Many users want to [export Office 365 mailboxes to PST format](#). Thus, we have added several advanced options for creating PST files as per your choice. Users can set the size of the resultant PST as 2 GB, 5 GB, and 10 GB accordingly. Even if you are using a non-English version of Outlook then you can also change the language of the PST file for better compatibility.
