

Hoverpen 2.0 Was Named To Time's List Of The Best Inventions Of 2022

TIME Magazine has released its annual list of the Best Inventions, which features 200 innovative products that are transforming our lives. This list was compiled through nominations from TIME's editors as well as through an online application process

Mumbai, Maharashtra Dec 22, 2022 (IssueWire.com) - Today, TIME reveals its annual list of the Best Inventions, which features 200 extraordinary innovations changing our lives.

To compile the list, TIME solicited nominations from TIME's editors and correspondents around the world, and through an online application process, paying special attention to growing fields—such as the electric vehicle industry, green energy, and the metaverse. TIME then evaluated each contender on several key factors, including originality, efficacy, ambition, and impact.

Of the new list, TIME's editors write: "The result is a list of 200 ground-breaking inventions (and 50 special mention inventions)—including life-mapping artificial intelligence, diamonds made from excess carbon in the air, and the most powerful telescope ever—that are changing how we live, work, play, and think about what's possible."

Notable among inventions that were included in the design section was Hoverpen 2.0 designed by [Novium](#). The company was founded by David Liang, a physicist in Taiwan. He along with his associates designed an artwork sculpted from aircraft-grade Aluminium. The team used Neodymium to magical effects to create a pen that pays tribute to earth as it does to science.

Designers that included scientists like David were completely involved in formulating a combination of metal alloys that makes simple yet magical tilt and possibly, freestanding as our earth is. As with other inclusions in the list, Hoverpen had admirers in mind who were intrigued and admired by science and magic to an equal extent.

'Novium' said in a statement that 'this award is not just a personal accomplishment, but a reflection of the innovative spirit that is alive and well in our industry. They are grateful for the opportunity to be a part of such a vibrant and forward-thinking community, and looking forward to continuing to drive innovation in the years ahead.'

TIME is renowned as one authoritative and independent publication that rewards extraordinary inventors in its annual list of inventions. [Hoverpen 2.0](#) with its groundbreaking design entices and inspires thinkers and inquirers into reality.

Like you, Novium enjoys and embraces the unknown and uncertainty. It is fascinated by that which has not yet been done. The company believes the purpose of life is to take on challenges and try different possibilities.

At Novium, the company's mission is to create unique and amazing products, accompanying you as you take on new challenges, step onto a whole new path, and live a unique life.

Achievers never rest upon their laurels. They continue to strive towards achieving the impossible. Following the footsteps of great intellectuals of all times, physicists and scientists at Novium continue to work towards the [sequel of Hoverpen 2.0](#). Expectations rife with regards to the novelty the sequel would show, Novium never seeks to disappoint patrons. Their ingenuity and inventiveness would continue to startle those spectators who never settle for the ordinary.
