

Jeffer Launches The World's first self checkout card for Expedited Exit

Beverly Hills, California Dec 29, 2022 ([Issuewire.com](https://www.issuewire.com)) - Richard H. Davis, President, and CEO of Jeffer International, Inc., states that his company intends to produce and market the JEFFER™ CARD, a one-of-a-kind debit card for payment direct to self-checkout. The JEFFER CARD is the only program that allows pre-approved, low-risk retail consumers to bypass secondary receipt checkout lines.

How does the JEFFER CARD work? After completing an application process and screening, JEFFER users are issued a Radio Frequency Identification debit card identifying a valid membership. When exiting the self-checkout, the JEFFER CARD automatically populates information to the Asset Protection specialists who can choose to let you continue out of the store without further receipt inspection. The staff at any store, including big-box establishments, can ask to see your receipt as you exit. Although in most cases, you'll probably acquiesce and hand the receipt over, you might wonder if there is an effective way to bypass the secondary receipt checkout lines.

Now with the \$100,00 JEFFER CARD membership 99% of the time, you should be able to walk out of the store with no hassles, just flash your card. It's important to note that the fee, which is paid with your application, is nonrefundable. Even if you're not approved after applying and paying, it won't be refunded. Once accepted the JEFFER CARD membership is valid for ten years. The JEFFER CARD membership pays 5% cash back on gas anywhere that Visa is accepted and a 10% discount on British Airways-operated round-trip flights departing from the United States and Canada. These benefits come at no extra cost.
