

Melissa Earley, BSN, RN, QMHP-C, NHDP-BC, Registered Nurse

Get to know Registered Nurse, Melissa Earley, who serves patients in Cherry Hill, New Jersey.

New York City, New York Dec 1, 2022 ([Issuewire.com](https://www.issuewire.com)) - Melissa is a registered nurse currently serving her patients in Cherry Hill, New Jersey. In order to provide her patients with the best care, she specializes in home care and hospice.

To begin her career, she earned her National Registry Certification as a Paramedic at The Medical College of Virginia in 1988 and has maintained her Paramedic Certification ever since. Throughout her EMS career, she has held many leadership positions, including an appointment to the inaugural State Childhood Injury Prevention Committee. Later, she earned her Bachelor of Science in Nursing degree from Virginia Commonwealth University.

Choosing to devote much of her career to child and adolescent behavioral health afforded her the opportunity to register with the Board of Counseling as a Qualified Mental Health Professional- Child (QMHP-C). Melissa is also board-certified as a National Healthcare Disaster Professional (NHDP-BC) by the ANCC and is a member of the Department of Behavioral Health and Developmental Services, Disaster Behavioral Health Team, and actively volunteers with the Medical Reserve Corps.

On a more personal note, she attributes her success to having compassion for her patients and providing them with the best care she can.

A Registered Nurse (RN) is a nurse who has graduated from a nursing program and met the requirements outlined by a country, state, province, or similar licensing body to obtain a nursing license. RNs fulfill a variety of job duties. In addition to their primary role in treating and caring for patients, their responsibilities also include educating patients and the public about a variety of medical conditions, as well as providing emotional support and advice to the families of their patients. Other RN job functions include leadership, research, performing diagnostic tests and analyzing results, operating medical equipment, administering medications, recording patients' symptoms and medical histories, and assisting with patient rehabilitation and follow-up.
