

Netvue Birdfy Hummee Takes Hummingbird Watching to A New Level

Los Angeles, California Dec 7, 2022 ([Issuewire.com](https://www.issuewire.com)) - Hummingbird is one of the most popular wild birds among many bird lovers. Novice and professional birders find them attractive because of their speed and dexterity. Due to the particularity of its feeding habits, Netvue specially designed an extension accessory to upgrade Birdfy to a hummingbird feeder.

The existing problems of traditional hummingbird feeder

When you take a look around bird feeder shops, you can find many feeders that are designed especially for hummingbirds, which can successfully attract hummingbirds to visit users' backyards. However, it is difficult for users to observe hummingbirds in a close-up view. Also, the only-for-hummingbird design only allows users to store liquid nectar. When users want to put some seeds to attract other birds, these traditional feeders cannot meet their requirements.

The best bird feeder for the hummingbird lover

[Netvue](#)'s newly-launched Birdfy Hummee Extension grasped the gap demand of hummingbird lovers. On the basis of its AI-powered Bird feeder camera Birdfy, this expansion accessory upgrades Birdfy to a smart hummingbird feeder to take care of the particularity of hummingbirds' feeding habits.

- **Watch birds closely anytime, anywhere:** With an HD embedded camera, Birdfy Hummee captures the bird's coming moment for users automatically. Users can thus observe hummingbirds closely and enjoy an excellent bird-feeding experience through Netvue App on a mobile phone.
- **Attract hummingbirds to stay with heart-warming design:** Hummingbirds love fresh nectar, also attractive colors! Birdfy Hummee adopts eye-cathy colors and good-looking flower designs. The polycarbonate structure helps prevent the ants and bees from polluting the reservoir. The design of the perch also allows hummingbirds to have a quick rest when eating, while the linear design of flowers allows birds to stagger, so as to welcome as many tourists as possible.
- **Enhance the bird-watching experience with user-friendly features:** Birdfy Hummee serves as the best un-leaking container to hold up to 18.3 oz nectar. The accessories are designed for convenient installation and cleaning and can be kept in good condition even in hot or cold weather.

Interested in getting Birdfy Hummee Extension to add to your Birdfy feeder and starting a wonderful hummingbird-watching journey? Shop on [Netvue](#) now!
