How Do We Help?

We will send a qualified, experienced Fire Compliance Assessor to check out your business's building. In line with The Regulatory Reform (Fire Safety Order) for fire compliance assessments, we will do a full fire compliance assessment.

Our trained professionals will find all possible fire hazards in the company building that could hurt employees or visitors.

From this, we will evaluate the possible fire risks in the company's building and suggest ways to meet legal requirements. This will not only make your workplace safer for your employees and visitors but also help protect your property.

After the assessment, we'll review the report and send you quotes for the work if we can help with any of the services we offer. This will help you stay in compliance and eliminate the stress of finding a company to do the work.

[Office Compliance Management](#) can give you consultants skilled in health and safety and fire risk assessments. This saves you time and money because they can do both on the same visit. Get in touch today to find out more.
