

Precisionary Instruments and Greenleaf Scientific Announce Partnership

Companies Aim to Streamline Tissue Sectioning in Life Sciences

Natick, Massachusetts Jan 1, 2023 ([Issuewire.com](https://www.issuewire.com)) - [Precisionary Instruments LLC](#), a leading designer and manufacturer of tissue slicers and microtomes, and [Green Leaf Scientific](#) today [announced their partnership](#) with an aim to bring tissue sectioning equipment to life science laboratories in Europe. We believe that our two companies will be able to work together very effectively, and we hope that this partnership will help us reach even more customers with our high-quality products.

Precisionary Instruments LLC is a company that specializes in the design and production of microtomes including the patented [Compresstome vibrating microtome](#) (commonly known as a vibratome) and [rotary microtomes](#). Their high-quality tissue slicers have been used by thousands of scientists and clinicians globally since the company's founding in 2004 by Dr. Jian-Qiang Kong, Ph.D. Over 800 peer-reviewed publications have been published by life scientists using the [Compresstome vibratome](#).

Green Leaf Scientific supplies scientific research instrumentation and software to laboratories throughout Europe, the Middle East and Asia. They are an Irish-based company staffed by scientists who enjoy contributing to the success of your research by working to find the best solutions for you. Green Leaf Scientific is part of Red Box Direct Ltd., a life sciences instrumentation specialist with over 17 years of experience helping scientists achieve their scientific goals. They pride themselves on their product knowledge and are dedicated to supporting customers' research.

Tissue slicing is an essential tool in almost every life science laboratory. However, the majority of manufacturers continue to produce antiquated solutions. Now manufacturing the world's best rotary and vibrating microtomes, Precisionary Instruments LLC has dedicated itself to continuous iterative development. The team at Green Leaf Scientific are delighted with Precisionary's decision to partner together in Europe.

Together, we anticipate that combining Precisionary's best-in-class tissue slicing solutions with Green Leaf Scientific's sales knowledge, customer service, and local market expertise will swiftly spur growth and advance research on tissue slices in Europe.
