

Reboot Coding School Launches In Bahrain, A Revaluation In Education

Bahrain, Manama: The global career game changer 01 Edu, is now in the Seef Area. Locally deployed as Reboot Coding Institute, applications opened on 14 December 2022 and they are doing things differently.

Manama, Bahrain Dec 22, 2022 ([Issuewire.com](https://www.issuewire.com)) - Both globally and locally there is a large-scale shortage of IT specialists, with big businesses often hiring foreign employees to fill those gaps. Ultimately, graduates of Reboot will enter companies at mid-level and can expect to earn higher salaries

starting from 1000BD, in large well known Bahraini and global companies including banks.

Traditionally, you have to study a set path for higher qualifications and to open up a new world of employment opportunities. However, we are now seeing the impact of the tech industry on education. Reboot is offering something very unique for Bahrain, skills come first in their innovative 2-year-only course. They take men and women from any background and age, teaching them everything they need to immediately enter a lucrative career as a software developer.

Students will work on projects in over 20 coding languages to become the highest-demand full-stack developers. This approach has already created thousands of careers worldwide and now the tech landscape of Bahrain is about to undergo a similar revolution.

"We want to give everyone a chance to change their lives. Reboot takes people with no experience, from any educational background, and transforms them into real full stack developers in only 2 years."

"We aim to create a scale ecosystem of full-stack developers in order to address the jobs of the future. There are many who might have completed a degree in another field but are stagnating in their job or not working. At Reboot it's never too late, you can shift your career into the lucrative and job-assured industry of tech."

Says Yanal Jallad, **Managing Director**, Reboot Coding Institute.

Not all education is the same, a full stack developer at Reboot means you will learn the entire depth of a computer system application, whereby a person has the skill sets to develop client (front end), server (backend), and database software.

The highly-paid world of coding is no longer about your past, it's focused on abilities, dedication, and potential. Anyone can become a software developer and enter the lucrative world of technology with the Reboot program. Apply for free online at www.reboot01.com and play their game to apply!
