

Tae Envy Takes His Listeners on a Steamy Ride with His Latest Song 'Wetter'

Tae Envy holds back nothing in his latest creation 'Wetter' as he pairs the most sublime music with raw and passionate lyrics, taking the audience into an arresting musical hold.

Detroit, Dec 1, 2022 ([Issuewire.com](https://www.issuewire.com)) - Enticing vocals bring a perfect brew of melody, passion, and raw sensuality, as rapper **Tae Envy** blends dreamy production and delightful instruments with his unapologetic and not-so-subtle lyrics into a no-hoots-given musical anthem. The artist easily sets the bar high with this new release, titled '[Wetter](#)' where the artist ensures the optimum use of his sultry

vocals and creates a seductive ambiance that gets listeners hooked at once.

The song begins on an extremely appealing note with the powerful vocals of the artist searing through the fabric of congenial instrumental strain. The song exudes a carefree aura and yet exhibits the purposeful handling of performance and songwriting. While the lyrics have a tantalizing effect on the listeners as it captures the raw and unfiltered emotions and thoughts of the singer, the music has a certain jiving effect to it that immediately puts listeners into a groove. **'Wetter'**, masterfully pairs the strong lyrics and adds to it a softness that is alluring and lets the true essence of the song seep through, exciting and soothing at the same time.

It was his brother's battle rapping that piqued Tae's interest in rap. Even when he went through rough phases, rapping was his companion until he realized it to be his calling. Tae then started mixing and recording his own songs, delivering hits like 'Plays' and 'Take it Off'. Though he draws inspiration from artists like Chris Brown and Tory Lanez, **Tae Envy** has successfully created a unique style that solely defines him. You can listen to his music on [Spotify](#), [SoundCloud](#), [Apple Music](#), and [YouTube](#). Follow him on [Facebook](#), [Instagram](#), and [Twitter](#) to never miss an update.
