

## The Manager of W3C Web Accessibility Evaluation Tools Writes About Atoall.com It Is a Useful Tool

Web Accessibility Tool of Atoall.com is launching the world's first website domain accessibility tool today. That will give more accessibility to website domains. Now private and government websites can give their services to the last man.

**Chandigarh, India Jan 2, 2023 (IssueWire.com)** - Atoall.com is launching the world's first website domain accessibility tool to increase business, marketing, sales, and new users from 2 billion regional and a billion disabled people of the world.

Robust: users must be able to access the content as technologies advance. The main rule of the WCAG. Private and government websites follow W3C's WCAG to increase digital accessibility, inclusion, equality, etc. To help differently-abled persons or disabilities.

The world has multiple languages and different health conditions for the public. Alphabets of domain names are also away from each other and in a language. So, 3 billion people cannot type website names easily.

If a person cannot open a website, then only he/she can feel the stress. Websites are the responsibility of private and government website managers or owners.

"The method of the new tool is to type any 3 keys twice as those in a line, for example, [aassdd.com](https://aassdd.com), [ffgghh.com](https://ffgghh.com), or [gghhjj.com](https://gghhjj.com). The website can be opened with these easy-to-use keys by just copying and pasting a small code from <https://atoall.com> on a website in the body tag or settings. When we say that press any 3 keys, it means we don't need any language to type," said **Web Accessibility Tool**.

- Open <https://webaccessibilitytool.com>.
- Open a new tab.
- Type in the address bar and any 3 keys that are in line on the keyboard. For example, **ppooii** or **jjkkll** and .com. it will be [ppooii.com](https://ppooii.com) or [jjkkll.com](https://jjkkll.com).
- One will see <https://webaccessibilitytool.com> again.
- One can see the same website without long, and language alphabets. When one types any 3 keys twice, that means no need for any language. Now 3 billion regional and a billion disabled people can get benefits from this tool.
- If a person wants to open <https://webaccessibilitytool.com>, then he/she needs knowledge of

the English alphabet, proper eyesight, working hands, and fingers. Otherwise, he/she needs help from a third person.

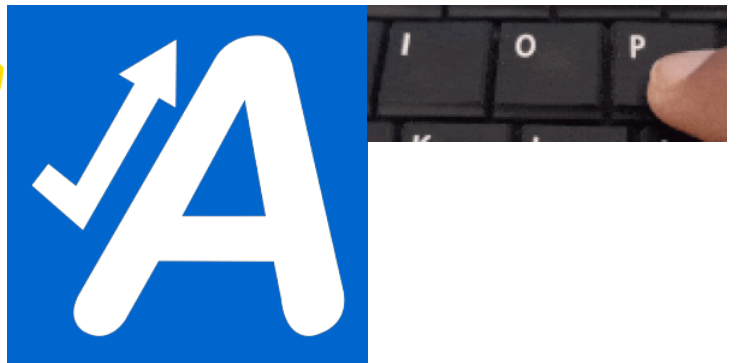

- Now they need this help for the next day, also, and so on. Now they depend on that person. With this tool, they will be independent.

### For a website manager or owner

- Copy the code **<https://atoall.com>**.
- Paste the code on the website into a body tag.
- Now upload it.
- Open the website in the new tab.
- Type in the new tab **<https://ppooii.com>**, **<https://llkkjj.com>** or **<https://ooiiuu.com>**
- One will see the website with this new tool. Users will get their web page more quickly. If this tool is on multiple websites, then to open the second, last, or third last visited website click on the icon of **Atoall.com** on your website. They will see images of visited websites, and click his/her website image.
