

U.S. News & World Report Names Villages Rehab & Nursing Center Among Best in Florida

Lady Lake, Florida Dec 5, 2022 ([Issuewire.com](https://www.issuewire.com)) - Villages Rehab & Nursing Center has been recognized as a Best Nursing Home for short-term rehabilitation for 2022-2023 by U.S. News & World Report.

The annual Best Nursing Homes ratings, now in their 13th year, assist prospective residents and their families in making informed decisions in consultation with their medical professionals about where to receive short-term or long-term

nursing home care. Only 16% of U.S. skilled nursing facilities earned the “Best Nursing Home” designation this year.

Villages Rehab & Nursing Center rated has a rating of 5 out of 5 for quality care and has a short-term rehabilitation rating of High Performing. Additionally, Villages Rehab & Nursing Center’s focus on patient-directed care has earned the Gold-Excellence in Quality Award from the American Health Care Association and National Center for Assisted Living (AHCA/NCAL).

“I am so proud of our tremendous long-term staff and providers that work together so we can accomplish incredible patient care,” said Debbie Brazill, Administrator, and owner of Villages Rehab & Nursing Center. “We have staff that truly care, and it shows in everything they do”.

For 2022-2023, U. S. News rated more than 15,000 nursing homes on care, safety, infection rates, staffing, and health inspections. For the first time, the Best Nursing Homes ratings feature a new measure on weekend staffing and another new measure on infection rates that led to hospitalizations.

“Choosing the right nursing home based on care needs and comfort is a critical decision for prospective residents and their families,” said Zach Adams, health data engineer at U.S. News. “The Best Nursing Homes ratings highlight nursing homes that excel in short-term rehabilitation and long-term care needs.”

The Best Nursing Homes methodology factors data such as residential care, safety, and outcomes. To calculate the Best Nursing Homes ratings, U.S. News evaluated each nursing home’s performance using a variety of data obtained from the Centers for Medicare & Medicaid Services (CMS). Both short- and long-term ratings include data on the consistency of registered nurse staffing, use of antipsychotic drugs, and success in preventing ER and hospital visits. The long-term care rating also includes measures of whether a home changed ownership and how well they were staffed on weekends. The short-term rehabilitation rating also includes measures of a home’s success in preventing falls, preventing serious infections, and making sure residents can return to their homes.
