Verestro™

Digital First

Verestro's end-to-end digital first solution provides an all-digital customer journey experience at different levels.

Zurich, Switzerland Dec 6, 2022 ([Issuewire.com](https://www.issuewire.com)) - [Verestro Fintech as a Service](#) is a Polish fintech company that helps businesses monetize their customer base with various fintech products like [card issuing](#), card acceptance, [money transfers](#), contactless payments, [loyalty](#), etc. Verestro provides fin-tech software solutions to ensure a fully [digitized customer experience](#).

A **single integration** with Verestro online payment processing platform enables instant card issuing, eKYC process, NFC HCE [tokenization](#), push provisioning to Apple Pay / Google Pay and other X-Pays, P2P money transfers incl. card-to-card solutions, [QR payments](#), managing loyalty programs, and other [payment solutions](#).

Recently, Verestro has also gained **cryptocurrency partners** who want to provide payment cards and accounts to their customers. Therefore, a cryptocurrency trading function can be added to the main functionalities of Verestro APIs. The company provides the creation and management of payment cards with the possibility to add partners' **crypto wallets** alongside fiat wallets.

Verestro is a **global payment technology partner** of banks, fin-techs, cryptocurrency exchanges, mobile operators, merchants, and eCommerce platforms. [Verestro's products](#) can be implemented within a few weeks with the highest security standards and flexibility.

"A close partnership with Mastercard helps us bring technology and innovation to customers around the world. Verestro is currently present with projects on 22 markets and 5 continents, continuing the global business expansion. Our mission is to support businesses with multiple fintech solutions in order to streamline payments and monetize their customer base,"

said Krzysztof Drzyzga, CEO, Verestro.
