

Boston Man Tapped To Head Distribution For One Of The Fastest Growing Energy Companies In The Nation

Boston, Massachusetts Jan 27, 2023 ([IssueWire.com](https://www.issuewire.com)) - Joel Deluca, a Boston native, has been tapped to head up distribution and consumer relations for one of the biggest upcoming energy companies in the USA. Already part of Global Energy Solutions, and Green Energy Treatments Inc, Deluca was the right person for the task. "Knowing his ability to work with numerous contacts. and his exceptional attention to detail, we felt that he was the right person for the job" a Green Energy Treatments Inc. company spokesperson stated.

As distribution of all EV systems begins to ramp up across the country, Deluca has already formed his team that will handle marketing and research, infrastructure, and all types of government funding, as well as tax incentives for different states. "I'm blessed to be given this opportunity to show the world what we have to offer". Deluca stated. "The technology, as well as the people involved, will certainly be a game changer".

Deluca credits Indong Advanced Materials Inc. a South Korean producer of secondary EV materials, and Green Global Energy Inc (GEGI) for their diligent work and agreements to work within each other. As of Monday, Jan 8, 2023, both companies have come to terms in a deal worth (US\$98.4 Billion) which will give Indong Advanced Materials, the mining rights to mine 1.215 million tons of lithium from an area in the vast Salar de Uyuni salt flat in South America. The companies aim to produce 4000 tons of lithium from a facility plant in Arizona that is in the early stages of construction. "Having both of these companies on your side, is a match made in heaven" Deluca says.

Deluca and his team are already engaged in conversations with the Department of Transportation, as well as officials in numerous states regarding distribution and job offerings as an incentive. "We have some great offers on the table presently" Deluca says, "They are only going to get bigger and better as time goes on". Distribution warehousing is being discussed presently and will begin finalization in the next coming weeks
