

EPOCH EPT will introduce AI intelligent transactions in 2023 that are trustworthy, secure, stable, and risk-free.

EPOCH EPT concentrates on integrating centralized exchanges (CeFi) and decentralized trading platforms (DeFi) to build a cross-platform trading model.

Hockley, Birmingham Jan 21, 2023 ([IssueWire.com](https://www.issuewire.com)) - Based on cutting-edge AI technology and in-depth research, independently develops quantitative research systems, trading systems, middle, and back-end systems, realizes the optimal interest rate for cross-platform transactions, provides non-custodial smart contracts for international users, and AI empowers investment funds to be allocated.

EPOCH EPT Group was founded in 2020 in London, England. It is a reputable and secure platform that enables users to transact more easily in the realm of digital assets. By integrating big data and artificial intelligence into the intelligent quantitative investing robot of the trading service platform, EPOCH EPT makes it simple for everyone to trade in financial derivatives involving digital currency and earn excess profits.

Major venture capital institutions and exchanges provided tens of millions of dollars in funding during the project's inception. EPOCH pioneers and visionaries establish a decentralized infrastructure to actualize a truly decentralized cross-platform integrated aggregating transaction ecosystem and to create an open, free, and inclusive financial "utopia" that benefits everyone.

The team consists of more than 30 top professionals in financial technology, blockchain technology, AI research institute, and data research center from Wall Street, Russia, Africa, and Asia.
