Los Angeles, California Feb 2, 2023 ([Issuewire.com](https://www.issuewire.com)) - Fisibility affords everyone their own **Financial Digital Assistant**, facilitating time-in-motion money management, daily task automation, & financial performance visibility.

The Fisibility Movement: Fisibility has embarked on the undertaking of assisting **all people** with achieving better insight into and better control over their finances & investments. Have fun using the app and be inspired to help and serve others.

Fisibility which stands for "**Financial Visibility**" is a multi-patent pending AI system designed for both Business Use & Personal Use in one single application.

Fisibility has identified the intersection between the **need** for affordable task automation technology that can deliver greater efficiencies with more velocity, and the **desires** of people wanting a better & more productive life while focusing on the vehicle that drives many of life's activities – Money.

Fisibility Understands & Empathizes with Three Basic Life Facts:

1. People are "**Extremely Busy**"
2. Managing Budgets, Expenses (receipts/payments), & General Finances is typically "**Not Fun**"
3. Tasks associated with number 2 are typical "**Very Time Consuming**"

The Solution: Fisibility's understanding & empathy resulted in the creation of the Fisibility Lite AI Financial Productivity App that is now being made available Free for everyone to easily incorporate into

one's Business & Personal life in order to be Better at Life.
