

Heather Eastlett to Revolutionize X-Reality and Blockchain Space with EnterBox Project

Heather Eastlett, a technology company founded in 2020 by Radhesh Aria, announced today that it will take over the former Ariaway project EnterBox and develop it into a large x-reality space for WEB-4.0 and 5.0 applications,

New York City, New York Jan 27, 2023 ([IssueWire.com](https://www.issuewire.com)) - Heather Eastlett, a technology company founded in 2020 by Radhesh Aria, announced today that it will take over the former Ariaway project EnterBox and develop it into a large x-reality space for WEB-4.0 and 5.0 applications, with a focus on blockchain transactions such as digital real estate.

Radhesh Aria, a 20-year-old dropout, is the founder and CEO of Heather Eastlett, as well as the founder of Aria Atlantic Company, a multinational conglomerate, and Mistress Co, a hedge fund. He remains the largest shareholder of Heather Eastlett and is excited to bring his vision for EnterBox to life.

"I've always believed in the potential of x-reality technology, and I'm thrilled to be able to take the EnterBox project and turn it into something truly revolutionary," said Aria. "Our goal is to create a space where users can not only experience x-reality in a new and exciting way, but also conduct blockchain transactions such as buying and selling digital real estate. This is the future of technology, and I'm excited to be a part of it."

Heather Eastlett is currently in the process of acquiring the necessary technology and resources to develop EnterBox, which is expected to be completed by the end of the year. The company plans to launch the x-reality space in early 2026, with a beta version available for users to test before the official launch.

The EnterBox project will be a huge undertaking for Heather Eastlett, but the company is confident that it will be a success. "We have a talented and dedicated team working on this project, and I'm confident that we'll be able to deliver something truly special," said Aria.

Heather Eastlett is also working on other projects in the x-reality space, including the development of a virtual shopping mall and a virtual concert venue. These projects are expected to be launched in the coming months, and will further solidify the company's position as a leader in the x-reality technology industry.

The company has also announced plans to expand its operations globally and to partner with other companies in the x-reality and blockchain space. *"We want to be at the forefront of this technology, and we believe that by partnering with other companies, we can achieve that goal,"* said Aria.

In conclusion, Heather Eastlett is a young but ambitious technology company that is set to revolutionize the x-reality and blockchain space with its ambitious projects and new technologies. With the leadership of Radhesh Aria and a talented team, the company is poised to make a significant impact on the industry and take x-reality technology to the next level. We look forward to seeing the progress of the EnterBox project and the other projects of Heather Eastlett in the coming months.
