

Jai-Jagdeesh Builds New Bones from Dust

Musician and Songwriter, Jai-Jagdeesh, explores rebuilding herself on the journey out of trauma and grief.

Washington, D.C, District of Columbia Jan 27, 2023 ([Issuewire.com](http://www.Issuewire.com)) - Jai-Jagdeesh releases her new album, '[From Dust](#)' today through Spirit Voyage Records. This album is a musical journey through trauma, grief, and recovery. As her broken heart crumbled, Jai-Jagdeesh allowed her music to wander in and out of reality and threads of what we call "sanity." She explores the layers of humanity on her most daring and introspective project to date.

"From Dust exists because something horrible happened. Words fall short when I try to describe it," says Jai-Jagdeesh, "but the result was that my heart broke, my body shut down, and my soul seemed to disappear. In that lost place, I wrote songs and made sounds. I tried, and failed, and tried again to gather together the pieces of what had once been a life that made sense to me."

From that process comes this album, rich with lyrics and melodies that express the discomfort and challenge of the liminal space, the chapter between what was and what will be. Guitars awash in reverb twist with the tails of violins to create a bed for her honest and intimate vocals. 'From Dust' is a falling apart and a search for rebuilding; a bittersweet journey; and Jai-Jagdeesh expresses it with the most exquisite and intentional touch.

'From Dust' includes thirteen tracks, taking us on a vulnerable musical journey with the release of the full album. It is available on all major music platforms.

Jai-Jagdeesh

Jai-Jagdeesh's latest musical autobiography, "From Dust," is a poetry of broken loss that teaches how to become whole again. Jai-Jagdeesh spent the past few years confronting uncomfortable truths and questioning long-cemented beliefs – oftentimes in the wake of devastating revelations. Asking "why" and "how" came first, followed closely by introspection, and as layers of trauma revealed themselves and her foundation crumbled, a painful process began. This dark chapter, with its quest for understanding, learning, repair, and renewal, is revealed over the course of 13 tracks. Listeners are invited to bear witness to the grief and growth that comes from facing betrayal and disillusionment as Jai-Jagdeesh reclaims her whole Self – encouraging listeners to do the same.

Jai-Jagdeesh has toured globally, taking audiences on a musical ride that transcends the all-too-brief concert-going experience. Having amassed millions of listeners with songs that defy classification, Jai-Jagdeesh's relationship with music continues to span continents and cultures through the wide ocean of the human heart. During her career, she has collaborated with Pulitzer Prize-winning journalist Ian Urbina, charted multiple times in the top five of iTunes's World Music Charts, and charted in the top ten of Billboard's New Age Music charts.
