

Landon Staley, DC, a Neurological Chiropractor with Axiom Chiropractic

Get to know Neurological Chiropractor Dr. Landon Staley, who serves patients in St. George, Utah.

New York City, New York Jan 6, 2023 ([Issuewire.com](https://www.issuewire.com)) - Dr. Staley is the Co-Founder of Axiom Chiropractic, a chiropractic facility in St. George, Utah specializing in neurologically-based family chiropractic care. He works alongside his wife, Cara Staley, serving all of Southern Utah with specific chiropractic care to address the cause of health concerns, aches, pains, and dysfunction.

“As a team at Axiom Chiropractic, it is our goal to help practice members and their families achieve their God-given health potential. It is our desire to equip Washington County and surrounding communities

with better health strategies through completely natural, drug-free health care that allows the body to heal itself. With Principled Chiropractic, nerve interference is removed with gentle, specific, scientific chiropractic adjustments, creating healthy cell metabolism, proper organ function, and restoring mental and physical well-being” as stated on their website.

Born and raised in Northern Utah, Dr. Staley never saw a chiropractor growing up. At a young age, he suffered from chronic ear infections which led to tubes in his ears on 3 different occasions. He later developed digestive problems that the medical doctors could never figure out what was causing them. He was told the problems would go away as he got older.

As a very active young man, he found himself with low back and pelvic pain while juggling different sports while in high school. Physical therapy helped with some of the pain and healing but it never fixed what was causing the reoccurring symptoms. While weight lifting regularly, he developed shoulder issues and the low back pain increased.

Finally deciding to try a chiropractor, not only did Dr. Staley find relief from the pain but he also noticed that he was no longer having digestive problems. The Chiropractor explained that chiropractic focuses on the nervous system which controls every function of the human body.

Dr. Staley realized that if more people understood and utilized regular chiropractic care, not only could many physically demanding lifestyle issues be prevented but there would be less need for drugs and surgery. He attended Life Chiropractic College, graduating with his Doctor of Chiropractic degree in 2019, and decided to make it his life mission to educate and bless others and loved ones with principled chiropractic care.

Chiropractic is a form of alternative medicine that mainly deals with the diagnosis and treatment of mechanical disorders of the musculoskeletal system, especially the spine. A chiropractor uses spinal adjustments, manipulation, and other techniques to manage patients’ health concerns, including neck pain, back pain, headaches, vertigo, and a long list of other ailments and conditions. They aim to improve patients’ functionality and quality of life by properly aligning the body’s musculoskeletal structure and enabling the body to heal itself naturally, without the use of medication or surgery.

Happily married, Dr. Staley and his wife, Cara, are the parents of three beautiful little boys, a Great Dane, and a Bengal.
