

Leapjuice Launches Managed WordPress and Ghost Hosting with AMD Epyc Milan Processors on Google Cloud

Cambridge, Massachusetts Jan 5, 2023 ([IssueWire.com](https://www.issuewire.com)) - Leapjuice Launches Managed WordPress and Ghost Hosting with AMD Epyc Milan Processors on Google Cloud

Leapjuice, an industry leader in cloud-based managed-to-host solutions, is proud to announce the launch of their new managed WordPress and Ghost hosting service, powered by AMD Epyc Milan processors on Google Cloud. This new offering provides customers with a secure and reliable hosting solution built on the latest technology from AMD.

The AMD Epyc Milan processors provide customers with improved performance, security, and scalability. With the Epyc Milan processors, customers can expect up to 40 percent more performance than previous generation processors, as well as improved security with the inclusion of advanced security technologies such as Secure Encrypted Virtualization (SEV). Additionally, the Epyc Milan processors offer customers the ability to scale their hosting solution, allowing them to increase their resources as their needs grow.

"We are excited to be offering our customers the latest in cloud-based hosting solutions with the launch of our managed WordPress and Ghost hosting service powered by AMD Epyc Milan processors," said Leapjuice Founder and CTO Andrew Talbot. "The combination of the performance, security, and scalability of the AMD Epyc Milan processors makes this the perfect solution for any customer looking for the best-in-class experience for their users, customers, and subscribers."

Leapjuice's managed WordPress and Ghost hosting service is available now and can be deployed quickly and easily. Customers can get started today and take advantage of the performance, security, and scalability of the AMD Epyc Milan processors.
