

Meritech announces EVO, the latest evolution of CleanTech® Automated Handwashing Stations

Golden, Colorado Jan 9, 2023 ([IssueWire.com](https://www.issuewire.com)) - Meritech, the leader in automated hygiene technology announced the release of their latest CleanTech® Automated Handwashing Stations called EVO.

CleanTech® EVO Stations contain patented automated hand washing technology that has revolutionized hand hygiene for the past 35 years. The next evolution of CleanTech® includes intuitive sensors, state-of-the-art solution cartridges, and a full-color touchscreen display to help enhance the perfect automated hand wash that is effective, easy to use, and environmentally sustainable.

The CleanTech® EVO line will consist of EVO One which is a free-standing single station system, EVO Wall which is a wall-mounted system, EVO Three which is a high-throughput triple-station system and EVO In-Counter which is a system that fits into any counter space.

“EVO is the result of a two-year effort by our talented and dedicated team to develop the next evolution of our hand washing technology.” Says David Duran, Chief Executive Officer. “Our goal with this new generation of systems is to increase the depth of our engagement with the user, improving the experience, driving higher levels of hygiene compliance, and minimizing our environmental impact.”

CleanTech® EVO is the world’s only automated handwashing station clinically proven to remove more than 99.9% of pathogens with each hand wash. The stations have 2 cylinders with 40 nozzles each that rotate around the hands 23 times in 12 seconds to whisk away harmful pathogens.

Intuitive sensors on the CleanTech® EVO systems ensure that the temperature, flow, pressure, and overall water conditions are optimal for the highest level of compliance and efficacy. There are also no touch points or cross-contamination between users thanks to a photo-eye sensor and closed-loop drainage system. The new touchscreen display will also assist in hand hygiene training and enhance customer support by providing onboarding and training videos as well as links to Meritech’s Digital Owner’s Guide. The CleanTech® EVO solutions cartridges can also be sent back to Meritech to be reused or recycled, reducing landfill waste.
