

## Phoenix Space Announces New Partnership with The Chaffinch Trust

An education-focused initiative that aims to unlock the enormous intellectual potential of disadvantaged young people in the Middle East - and globally - empowering them with the opportunity to transform their lives and communities through STEM.

**London, United Kingdom Jan 30, 2023 ([Issuewire.com](https://www.issuewire.com))** - We are on a mission to unlock the enormous intellectual potential of disadvantaged young people, empowering them with the opportunity to transform their lives and their communities through scientific and technological training.

Following this commitment, we are very excited to announce that we are partnering with The Chaffinch Trust to deliver a pilot educational program in Amman, Jordan for refugee children aged between 14 - 16 years. This partnership is coming at a time when out of the 89.3 million forcibly displaced people worldwide, an estimated 36.5 million (41%) are young people below 18 years of age.

Phoenix Space was founded to increase scientific and technological literacy among refugee and disadvantaged youth, delivering cutting-edge STEM-focused educational courses to underserved communities in the Middle East and globally.

The Chaffinch Trust is a charitable organization based in the UK. It develops and executes initiatives and projects which not only encourage but also support the disadvantaged in our societies to meet the challenges they face.

This collaboration, which commenced in the second week of January, involves the use of the Phoenix Space Flagship STEM Program, which was specifically designed with the inspirational theme of Space Science by our tutors.

Everyone at Phoenix Space is very excited about the partnership as it will enable us to make even more of an impact on the lives of this displaced youth community, knowing that we have the support and backing of The Chaffinch Trust.

Finally, please read about the great work we've done in the past, the projects we are currently working on, and what we are planning for the future at <https://phoenixspace.org/>
