

See Life in a New Light at Dr. Bock Low Vision

Help for Macular Degeneration

Fresno, California Jan 23, 2023 (IssueWire.com) - Vision is critical for a human being to do daily activities. Unfortunately, decreased vision from Macular Degeneration makes these ordinary tasks challenging. But now with help from the dedicated Low Vision specialist Dr. Andrew Bock, the ability to do your everyday tasks even with Low Vision can be improved. Dr. Bock has helped many patients to live more independent lives after being told there wasn't anything more that could be done. Dr. Bock is one of over 40 optometry practices in the IALVS which help patients to enjoy daily life activities like recognizing people's faces seeing television, reading, driving, and cooking.

One of the most successful examples is the 94-year-old who has been struggling with Macular Degeneration and could not play cards on the computer. With the help of the Doctor's recommended reading telescopes, she went back to where she could play cards on her computer.
