

Seeing new innovations in ophthalmic products and services

The World Conference on Ophthalmology & Eye Care will take place from 21st to 23rd August 2023. During 3 science-packed days, top experts in all fields of ophthalmology will connect from around the globe to shape the future of eye care.

Somaglia, Lodi Jan 3, 2023 ([IssueWire.com](https://www.issuewire.com)) - The People Event hosts the **World Conference on Ophthalmology & Eye Care** (Eye Care 2023) that discusses the new paradigm approach to probe every single element in Ophthalmology/ Eye care. Eye care 2023 focuses on many interactive scientific sessions on different types of Eye disorders and Eye care as well as various diagnostic and therapeutic advancements in this field. It also provides an opportunity to showcase your ingenuity to the world. Eye care 2023 will be organized around the theme “Seeing new innovations in ophthalmic products and services” on **August 21- 23, 2023**.

The major focus of the Conference includes new mechanisms for targeting specific Proteins in the Eye, the Latest uses of eye Cells in Medicine, Advances in ophthalmology, Emerging trends in Stem Cell Research, Advancements in Diagnostic & Therapeutic areas of Ophthalmology, Future directions in Pediatric Ophthalmology/ Eye Diseases and many more.

The attendees of the Congress will enjoy special events and lectures featuring expertise in the field. It is a perfect platform for ophthalmologists, Eye Surgeons, immunologists, pathologists, research scholars, University Professors, industrial professionals, and student delegates from biomedical and healthcare sectors to explore every single element in Ophthalmology/ Eye Diseases. Eye Care 2023 will also provide an excellent opportunity for budding scientists and young researchers through its special initiatives like the Young Researcher Forum, Poster Presentation, B2B, and Scientific Meetings.

Conference Highlights:

- 100+ Participation (70 Industry: 30 Academia)
- 5+ Keynote Speakers
- 30+ Plenary Speakers
- 5+ Exhibitors
- 18 Innovative Educational Sessions
- 5+ Workshops
- B2B Meetings

Statistics:

A cataract is often considered a disease of affluence, but about 70% of Eye diseases occur in low- and middle-income countries.

- A 2012 study in The Lancet Ophthalmology predicted that from 2008-2030, Eye Diseases incidence will rise 75 percent globally and will double in the least developed countries.
- Glaucoma affects millions of people throughout the world and is particularly common among those whose ancestors came from sub-Saharan Africa; Spanish-speaking regions in the Western Hemisphere (South America, the Caribbean, and Central America); Saudi Arabia; India; and Mediterranean countries such as Turkey, Greece, and Italy.
- Diabetic Retinopathy affects 1 in 5,000 male births. About 400 babies are born with hemophilia A each year.
