Your kitchen is the most important place in the home because it is a place where you make many happiness and memories that happen every day. This is the reason why the entity is so focused as this gives them reasons to make development in their products. The entity focuses on electric appliances ODM, particularly built-in induction cooktops because they believe that electricity will be more convenient and bring more possibilities, making our life safe, clean, and smart. Because of these developments in the products, people's life will become easier. The entity has its R&D Team, Purchasing Team, production team, and quality team so that the customers can get a design, purchase goods, and enjoy service directly from the entity and you will never need a third party. The built-in electric cooktop is a nice addition that you can make in your kitchen because it helps in maintaining a cooler temperature in the kitchen, the flatter surface of the cooktop is much easier to clean. The installation price of the built-in electric cooktop is reasonable.

The entity passed the ISO inspection test in 2019 and since then it has become unbearable. It opened a new 3000 square meters production center start into service which is fully equipped with the automatic assemble line. The factory can manufacture about 6000pcs cooktop daily. Shenzhen H-one focuses on heating technology, starting with Hair straightened design and sale. To research the smart cooking system, the brand "Doopen" was launched by the entity in the market in 2008 which brings our smart cooking concept products constantly. With the developments in technology, the "Intelligent" Equipments have made our lives so much easier. The more customizable experiences offered to the entity, the more it benefits the customers. The entity also supplies finished products, SKD, and PCBs parts and they customize products as per your wish.

The entity launched a new cooking concept which is Sous Vide which has grabbed users' eyes and is becoming more and more popular in the market these years. The success of Sous Vide shows that the entity gives more attention to healthy eating habits. And the entity has three main product series in line which are built-in hobs, Sous Vide cookers, and smart curtain robots. They also build a lot of cooperated projects such as air cleaners, desktop cookers, electric grills, etc. The built-in hobs come with an induction heating system, electrical resistance heating system, and temperature control system.
