London, United Kingdom Jan 27, 2023 ([Issuewire.com](https://www.issuewire.com)) - Telecom's consultancy STL Partners will be joining MWC Barcelona the world's largest mobile technology event. STL Partners will be providing analyst briefings on key topics including metaverse, sustainability, and private networks.

MWC Barcelona will be hosted at the Fira Gran Via from 27 February to 2 March. Expectations are that this year's [MWC23](#) will host between 2,000 to 2,500 exhibitors, with tens of thousands of mobile industry decision-makers from more than 180 countries and territories due to attend.

MWC 2023 will focus on five themes that explore the latest technologies that are essential to the seismic shift that will advance the telecoms industry 5G Acceleration, Reality+, OpenNet, Digital Everything, and FinTech.

STL Partners will be offering [analyst briefing sessions](#) throughout the week of MWC23. Appointments can be booked to explore and validate questions with an external expert opinion.

Topics available for the analyst briefing include:

- Metaverse & Web 3.0: What are the telco plays in the Coordination Age?
- Sustainability in telecoms
- TCO impact on becoming a cloud-native telco
- Private networks: Where's the real opportunity?
- What will it take to grow consumer revenues?

- The state of transformation

To learn more about booking an analyst briefing visit the [STL Partners website](#).

About STL Partners

[STL Partners](#) is a leading research and consulting firm that focuses on the telecoms industry and adjacent markets, by supporting telcos and their partners to innovate, grow and stay ahead of the competition.
