Denver, Colorado Jan 12, 2023 ([IssueWire.com](https://www.IssueWire.com)) - Tirapid, a [custom plastic parts manufacturer](#), has announced the opening of a new manufacturing facility in Racine, Wisconsin. The company plans to create up to 125 jobs at the new location over the next three years.

The new factory will have state-of-the-art equipment and will specialize in producing custom injection molded plastic parts for customers in a variety of industries. Tirapid is committed to providing quality products and excellent customer service, and this new facility will help them meet the growing demand for their products. Visit our website today to learn more about our capabilities and how we can help you with your next project.

A Look Into Custom Plastic Parts Manufacturing at Tirapid

Have you ever wondered about the process of custom plastic parts manufacturing? Are you looking to have custom plastic parts made for your own product? If so, then Tirapid may be the perfect fit for you! Today we will explore the services offered by Tirapid, a leading manufacturer of custom plastic parts.

What is Custom Plastic Parts Manufacturing?

Custom plastic parts manufacturing is a process in which custom plastic components are designed and produced to meet specific customer needs. The process involves creating molds or dies from detailed drawings or CAD models supplied by the customer. In addition to designing and producing custom plastic components, there are numerous other services that can be provided, including prototyping, 3-D printing, assembly, and finishing. All of these services work together to ensure that each part meets the exact specifications of the customer.

Why Choose Tirapid?

Tirapid offers many advantages over other companies when it comes to custom plastic parts manufacturing. First and foremost, they offer high-quality products at a competitive price. With more than 25 years of experience in injection molding and mold design, they have perfected their skill set to ensure that each piece produced meets the highest standards. Additionally, their team has extensive knowledge in engineering and material selection; this allows them to make informed decisions when selecting materials for your project. Finally, their ISO 9001 certification ensures that all processes adhere to international quality management standards—ensuring that each part is produced correctly every time.

Plastic Products Series:

CNC Milling Plastic Parts

CNC milling is an efficient way of producing custom plastic parts with incredible precision and detail. As a **Custom Plastic Parts Manufacturer**, [Tirapid](#) utilizes the latest CNC milling processes to produce the most accurate parts available. Not only are plastic parts made faster with CNC milling, but the process also results in less waste overall and a consistent quality between batches. With a wide variety of plastics to choose from and versatile capabilities for complex shapes and sizes, CNC plastic parts production can easily handle your custom project needs with expertise.

Plastic Turned Parts

Tirapid is a renowned Custom Plastic Parts Manufacturer, known for providing top-of-the-line products. They have a team of skilled professionals behind the scenes who develop innovative and precise plastic-turned parts that meet all customer specifications. From simple designs to complex assemblies, Tirapid can create the precise parts you need for any application. Precision machining ensures an exact fit on each plastic part produced so that your assembly looks and functions without issues. With world-class customer service, superior quality design, and competitive prices, Tirapid is the go-to Custom Plastic Parts Manufacturer for all of your precision-turned parts

When considering having [custom plastic parts manufactured](#) for your own products or applications, look no further than Tirapid! With an experienced team of engineers and designers on hand, along with an ISO 9001 certification and competitive pricing structure - they provide an unbeatable service for anyone looking for quality custom plastics at a great price!
