

Ventriks Adds OTC Global Holdings To Data Marketplace

Ventriks, a cloud data technology company, is delighted to announce a new partnership with OTC Global Holdings (OTCGH), the world's largest independent institutional broker of commodities, to the Ventriks Marketplace and Data Platform.

London, United Kingdom Jan 20, 2023 ([IssueWire.com](https://www.issuewire.com)) - The new partnership includes data from OTC Global Holdings EOXLive Market Data, which includes forward curve data for electricity, crude oil, natural gas, and global refined products, ensuring access to a wider range of market information, and enabling decision-makers with more accurate and actionable insights.

Richard Quigley commented "Ventriks Data Marketplace provides our data partners the opportunity to attract and engage with a wider audience and our clients to have a better experience in sourcing, procuring, sharing, and analysing data content. It is a hugely welcome addition to the growing portfolio of Data Partners".

"OTC Global Holdings is delighted to work with Richard and the team at Ventriks to expand our market data product's reach further into the European and global marketplace," said Campbell Faulkner, Senior Vice President at OTCGH. "Combining forces means that mutual clients will be able to streamline their data ingestion and analytics on top of our unique and market-leading energy commodity forward curves and implied volatility surfaces."

About Ventriks

Ventriks help customers accelerate and enable actionable information with the cloud-native Ventriks Data Platform. Unbounded by scale, flexibility, and data type, organisations can extend and mature their data management and analytical workloads using data-application-ready connectors, automated workflows, and an advanced business rules management system, supported by a Digital Data Marketplace. Ventriks powers the complete data journey across all industries and geographies.
