

Amanda Hutton Parrott, NP, a Legal Nurse Practitioner Consultant with Parrott & Associates

Get to know Legal Nurse Practitioner Consultant, Amanda Hutton Parrott, who works in San Francisco, California.

New York City, New York Feb 8, 2023 ([IssueWire.com](https://www.IssueWire.com)) - Amanda is a doctoral-trained nurse practitioner, researcher, and professor in San Francisco, California who brings a wealth of training and experience to her profession. She excels at diagnosing and treating patients in urgent care, primary care, infectious diseases, and global health.

By applying current clinical research and best practices, she can provide patients with optimal care. She is dedicated to supporting disease prevention practices and helping individuals lead healthy lives.

After completing her Doctor of Physical Therapy degree at New York University, Amanda volunteered at Groote Schuur Hospital and the surrounding townships in South Africa. Her interest in infectious diseases and global health was sparked. She deepened her knowledge in the medical field by completing her Master of Science in Nursing degree at the University of California, San Francisco.

After graduating with honors, Amanda continued to work internationally and took her first position at UCSF in the Infectious Disease Department as a clinician and researcher. Her passion for the art and science of medicine grew during her nine years at UCSF, where she treated hundreds of patients living with HIV and other infectious diseases. She also published six papers on bone mineral density disorders, aging, as well as HCV in HIV individuals.

During the past few years, Amanda expanded her clinical focus to include urgent and emergent care. Her international work continues with International Medical Relief as a clinician in Uganda, South Africa, Nepal, Brazil, and recently disaster relief in Haiti and Poland.

In 2020, she founded Parrott & Associates.

As a legal NP consultant, she educates attorneys on complex medical pathophysiology, analyzes and summarizes supporting medical research, screens cases for merit, assists with discovery/production, and serves as an expert witness.

A Nurse Practitioner (NP) is an advanced practice registered nurse and a type of mid-level practitioner. NPs are trained to assess patient needs, order and interpret diagnostic and laboratory tests, diagnose disease, as well as formulate and prescribe treatment plans.

On a more personal note, Amanda attributes her success to treating patients by recognizing the whole person: emotional, spiritual, and physical.
