

Bonamour Sleep Company Announces the Release of the Bonamour Sleep PRO (2023)

The Latest Addition to Its Revolutionary Sleep Aid Product Line.

Boca Raton, Florida Feb 14, 2023 ([Issuewire.com](https://www.issuewire.com)) - Bonamour Sleep Company Announces the Release of the Bonamour Sleep PRO (2023), the Latest Addition to Its Revolutionary Sleep Aid Product Line.

Bonamour Sleep Company, a leading provider of sleep aid products, is thrilled to announce the release

of its newest product, the Bonamour Sleep PRO (2023).

This product builds on the success of the Bonamour Sleep PROs, currently the smallest sleep earbud in the market to use Brainwave Entrainment Sound Waves for deep sleep support. The new Sleep PRO (2023) model utilizes battery technology enhancements since last year that allow for a smaller size battery, without substituting battery life, sound quality, or noise canceling features.

The Bonamour Sleep PRO (2023) features a reduced size and flat surface, making it an ideal choice for side sleepers who want to avoid any discomfort or pressure on their ears during sleep. Additionally, the earbuds are equipped with a soft silicone ear molding design, which ensures comfort and a secure fit throughout the night. The enhanced TWS Bluetooth technology allows for seamless pairing with mobile devices and improved sound quality.

"We're excited to introduce the Bonamour Sleep PRO (2023) to our customers," said Jackson Smith, CEO of Bonamour Sleep Company. "We understand that quality sleep is essential for overall well-being, and our product line is designed to provide solutions for everyone who struggles with sleep. With the Bonamour Sleep PRO (2023), we've taken customer feedback into account and made improvements that cater to the specific needs of side sleepers who have struggled for finding a sleep earbud that was small enough to wear without notice."

The product is currently available for sale through the Bonamour Sleep website, bonamoursleep.com, and through select online and retail partners.
