

CDE Asia wins India Green Awards 2022 for Sustainable Waste Recycling

kolkata, West bengal Feb 10, 2023 ([Issuewire.com](https://www.issuewire.com)) - CDE Asia was recently recognized as a leader in Green Construction and Demolition Waste Recycling at the prestigious India Green Awards organized by Progression Global. These awards have been constituted to honour and celebrate the efforts and success of all key contributors who are playing a role in turning the dream of a sustainable greener planet into reality.

The environmental awards are classified into several categories and are open to all leading organizations in India engaged in activities related to improving the quality of life through sustainable environmental development. **The 2022 edition featured a selection of entrants in a live forum event plus a wonderfully interactive and immersive online broadcast of the same.**

Working across India and South East Asia, CDE Asia's breakthrough sustainable sand solutions are a driving force in reimagining waste management and recycling solutions to usher in a future that's smart, resilient, and sustainable. **The country's first C&D Waste Recycling plant was supplied to Delhi in 2010 by CDE Asia. Over the years more plants have been successfully commissioned in Delhi. Other cities, including Hyderabad, Thane, Pune, and Surat, have chosen CDE Asia to set up their C&D Waste processing facilities.**

Speaking on the occasion, **Mr. Nitin Dubey, Chief Revenue Officer, CDE Asia**, said, “We are honoured to be recognized for our advanced waste management solutions. Construction & Demolition Waste, if not managed properly can be a huge urban menace. Microdust particles from C&D Waste are a major contributor to air pollution. The C&D waste generation in India is estimated to be 500 million tonnes every year whereas less than 1% of this is recycled. **Recycling the assorted wastes, like legacy waste, trommel fines, bottom ash, etc., allows customers to recover quality sand and aggregates for use in high-value construction applications including concrete and asphalt production.**”

We would like to express our gratitude to Progression Global for serving as a driving force for the transformation of society into a sustainable community through environmental development and for **recognizing our work toward creating a waste-free India.**
