

DBI360 Introduces Cutting-Edge Features for ConfluxHR - Its HRMS Platform

Bhubaneswar, Odisha – DBI360, a renowned business solutions developer, announced the addition of several new capabilities to ConfluxHR, an HRMS software.

Bhubaneswar, Odisha Feb 13, 2023 ([Issuewire.com](https://www.issuewire.com)) - **ConfluxHR** has taken an oath to modernize and simplify the core HR operations of numerous businesses, making it easier for firms to manage their business efficiently.

The first new feature is the [Digital TDS Calculator](#), which has been added to the payroll management module. This system automates the TDS calculation process for all employees, reducing the chance of errors and saving time for HR departments.

The 'Dynamic Payhead' feature allows clients to set up alternative pay heads for individual employees rather than being restricted to a static pay head structure. This will enable firms to tailor their payroll management to the specific demands of their employees.

ConfluxHR now provides a function for '[Tracking Intern Attendance](#)' and processing Intern payrolls. This enables firms to digitize their resource management process, increasing efficiency and accuracy.

The tool also allows firms to 'Change the Letterhead' of offer letters, making it easier to refresh their branding as needed. Users can also now 'Change the Design of Employee ID Cards,' providing greater control over their company's visual identity.

The 'Yearly Leave Set up' function allows HR departments to add and manage employees' annual leave, removing the need to update leaves each month manually. ConfluxHR now generates offer letters, key performance indicators (KPIs), and emails with job descriptions, making it easier for enterprises to manage their hiring processes.

"We are happy to provide these additional functionalities to our HRMS software," stated [DBI360](#)'s COO **Chandra Shekhar Singh**. "Our mission is to provide our clients with the tools they need to better manage their human resources. These new features are just the start of our commitment to constantly enhancing our platform while bringing tremendous value to global enterprises," he added.
