

EnPower Announces Launch of eMobility Business Unit and the Hiring of Joseph Fahrney SVP, eMobility

Birmingham, Alabama Feb 9, 2023 ([Issuewire.com](https://www.issuewire.com)) - EnPower Solutions, a leading Solar Decarbonization as a Service and renewable energy solutions provider headquartered in Birmingham, Alabama is excited to announce the launch of our eMobility business unit along with the hiring of Joseph Fahrney to lead this new division as Senior Vice President, eMobility.

With the addition of Joseph Fahrney, EnPower is expanding its renewable energy solutions into the eMobility market to support organizations looking to deploy electric vehicle charging infrastructure. Joseph brings a decade of experience in both the technology and renewables industries. Most recently, he served as the Vice President of eMobility for Shoals Technologies where he was a key leader who launched the company's EV business unit.

EnPower's eMobility division will be focused on helping private and public sector organizations enable and accelerate their EV charging infrastructure deployments with turnkey solutions that include designing, building, owning, and operating NEVI (National Electrical Vehicle Infrastructure) fueling stations across the United States. Focusing inward on the customers' needs, EnPower's team will help consult, design, develop, and construct to enable savings and deliver a superior EV charging infrastructure deployment. Our goal is simple: to help customers move electric vehicles from A to B in the most efficient and economical way possible.

"The electrification movement is fully upon us. We are early in the adoption and movement toward eMobility. EnPower is excited to announce the launch of our eMobility business unit, and the addition of Joseph Fahrney to our team. Joe brings to the organization specialized knowledge and an unmatched industry voice always focusing on each customer's need. Our commitment to service will include deploying and maintaining eMobility assets as fleet operators, mixed-use developments, municipalities, and travelers' transition from ICE vehicles. Our team will provide the planning, design, engineering, construction, and project management to deliver options that best serve each customer's needs. EnPower will also be investing in the ownership and operation of NEVI-compliant EV Fuel stations," said Evan Bates, CEO of EnPower.

About EnPower Solutions

EnPower Solutions is a full-service, turnkey solar energy independent power producer. Our team ushers projects through design, build, and operations to deliver reliable and cost-effective energy solutions.
