

Get The Smile You Wanted With Invisalign At Ortega Cottage Dentistry, San Juan Capistrano, CA

San Juan Capistrano, California Feb 17, 2023 ([Issuewire.com](https://www.issuewire.com)) - Ortega Cottage Dentistry provides Invisalign treatment at their office in San Juan Capistrano. The revolutionary orthodontic system is designed to correct misaligned teeth with nearly invisible aligners made from medical-grade plastic. Patients looking for a more discreet and less invasive alternative to traditional braces can now visit Ortega Cottage Dentistry for this groundbreaking technology. Invisalign works by gradually shifting teeth into proper alignment using specially molded trays that fit over the upper and lower sets of teeth.

Unlike metal braces that must be adjusted every few weeks, each set of new aligners is custom-made according to the dentist or orthodontist's instructions. The patient changes these trays as instructed no more than once every two weeks until desired results are achieved without having to make clinic visits during that time other than routine checkups.

Dr. Michael Kim feels privileged to provide his patients access to today's most advanced dental technologies like [Invisalign treatment](#). "Our investment in high-tech equipment reflects our commitment towards providing excellent service quality," he said when asked how he felt about launching such innovative treatments at his practice.

Our experienced and dedicated staff members work hard to ensure each patient is given top-notch care in a comfortable and relaxed environment. We pride ourselves on delivering personalized service that meets each patient's needs, utilizing advanced technology for comprehensive diagnosis and treatment

planning. We are committed to providing high-quality dental treatments that are tailored to meet your exact needs and desires.
