

Hartek Group Announces the Launch of it's Rooftop Solar Panels

Due to the threat of climate change, we are increasingly dependent on pollution-free energy sources in order to minimize greenhouse gas emissions.

Mohali, Punjab Feb 13, 2023 ([IssueWire.com](https://www.issuewire.com)) - The HARTEK GROUP is a leading Engineering, Procurement & Construction (EPC) Major operating across the entire power sector value chain. With its five business units, the Group is engaged in Power Systems, Rooftop Solar, Power Distribution Products, Fuel, and Smart Cities. With a history dating back to 1991, HARTEK is one of India's most admired brands.

Solar PV energy is without a doubt one of the cleanest sources of electricity and is now being considered in conjunction with conventional electric systems based on fossil fuels. It is with the utmost joy that Hartek Solar, a leading **rooftop solar company in India**, announces yet another launch. Check out the rest of the story below.

FOR IMMEDIATE RELEASE:

Date, place: As a result of their potential to reduce reliance on conventional fossil fuel-based energy, solar rooftop systems have emerged as a potential green technology to address climate change issues. Currently, solar rooftops are being installed at an accelerating rate in India. Due to its geographic location, our country receives an abundance of tropical sunlight. Almost 300 days of clear skies are available in India each year, making it one of the best countries for harnessing solar energy in the world.

Over the past 16 years, **Hartek Group** has been primarily involved in manufacturing (machinery and equipment), and the company's operations are currently active. The company ranks among the most reputable and reliable **rooftop solar companies in India**. A solar power system with an installed capacity of over 80 megawatts is being developed by the company. Through optimum site assessment, best engineering and design practices, comprehensive procurement, and on-time project installation and commissioning, they provide complete turnkey solutions. Additionally, Hartek offers comprehensive operations and maintenance services for solar projects.

You are secure with Hartek thanks to:

- An increase in empowerment and a decline in growth when compared to a market segment.
- Combining the experience of experienced leaders with the energy of young teams.
- Women empowerment and rich cultural heritage.
- Support from the management in bringing new ideas, innovations, and technologies to the organization.
- Their business has grown rapidly in recent years and they have received repeated orders from reputable customers.
- Relationships between vendors and subcontractors are strong.

- Integrated working culture involving numerous functional teams - Engineering, Procurement, Execution, Finance, HR, and Administration.

During the execution of various other projects country-wide, Hartek Power Private Limited demonstrated a high level of engineering, procurement, and construction expertise. In addition to reducing carbon emissions, Hartek Solar strives to promote sustainability. Taking part in the growing global coalition for net-zero emissions is something they are extremely proud of, as a leading renewable energy company. With a reputation as a trustworthy [rooftop solar company in India](#), Hartek partners with organizations seeking to achieve their ESG goals and contribute to the move toward 100% renewable energy sources.
